

SPECIAL ENEWS

From: Center for Mental Health in Schools at UCLA

Re: UPDATE (10/6/05) — Disaster Aftermath

As previously noted, this and subsequent special ENEWS mailings will continue to distribute materials, additional guidance notes, and other information and sharing on a regular, but not daily basis.

We encourage you to keep sending us information to share with others, indications of what is needed and what is helpful. Your input is essential and is greatly appreciated by others across the country.

>>ADDRESSING STUDENT ADJUSTMENT PROBLEMS – This is the time to ensure that students relocated because of recent disasters, and indeed, all students have made a good adjustment to school. And, if they haven't, it is time to address any problems in the earliest stages.

By now, it will be clear to most teachers which students are experiencing difficulties adjusting. This is the time to be *proactive*. This is the time for *staff development* to focus on specific strategies to address adjustment problems. This is the time for *student support staff to work with teachers in their classrooms* to intervene before problems become severe and pervasive and require referrals for out-of-class interventions.

Attached is a set of Guidance Notes for addressing student adjustment problems; we hope you find them helpful.

Please share back any successful strategies so we can circulate them to others.

>>UPDATES

**President Bush signed into law on Sept. 30 the Assistance for Individuals with Disabilities Affected by Hurricanes Katrina and Rita Act of 2005, granting the U.S. Education Department authority to permit hurricane-affected Gulf Coast states access to \$25.9 million in federal funds for vocational rehabilitation (VR) services without the states having to provide matching funds. These VR services may include education, training, assistive technology or various supports necessary for employment of individuals with disabilities affected by Hurricanes Katrina or Rita that contribute to the economic growth and development of communities. "Children and adults with disabilities face challenges with the loss of their homes and supports for daily living," Secretary of Education Margaret Spellings said. "Through the department's Office of Special Education and Rehabilitative Services, this funding will provide additional assistance to those with disabilities affected by the hurricanes."

Federal funds for VR services will be made available to affected states in the following amounts:

- Louisiana, \$16.4 million;
- Mississippi, \$6.1 million;
- Alabama, \$1.7 million; and
- Texas, \$1.7 million.

Beyond the support to people with disabilities provided by this new law, the attached fact sheet lists additional efforts by the Office of Special Education and Rehabilitative Services to help hurricane victims.

****Separate but Equal? Schooling of Evacuees Spurs Debate – Some 372,000 schoolchildren were displaced by Hurricane Katrina — and now, a number of states want to teach some of these students in shelters instead of in local public schools, a stance supported by the Bush administration and some private education providers. Advocates for homeless families and civil rights oppose that approach. The central question: does the McKinney-Vento Act -- a landmark federal law banning educational segregation of homeless children -- apply to the evacuees?**

Addressing School Adjustment Problems

It is only a matter of weeks (sometimes days) after students enter a new school or begin a new year that it is clear to most teachers which students are experiencing difficulties adjusting (e.g., to new content and standards, new schools, new teachers, new classmates, etc.). It is particularly poignant to see a student who is trying hard, but is disorganized and can't keep up. If these difficulties are not addressed, student motivation for school dwindles, and behavior problems increase.

This is the time to be *proactive* and to address any problems in the earliest stages. This is the time for *staff development* to focus on the type of strategies stressed in this guidance. This is the time for *student support staff to work with teachers in their classrooms* to intervene before problems become severe and pervasive and require referrals for out-of-class interventions.

This guidance focuses on
 addressing transition problems
 enhancing engagement in learning
 working as a team to prevent problems from escalating.

Also, included are links to in-depth prevention and early intervention strategies.

SOME GUIDELINES:

Through enhanced personal contacts, build a positive working relationship with the youngster and family.
 Focus first on assets (e.g. positive attributes, outside interests, hobbies, what the youngster likes at school and in class).
 Ask about what the youngster doesn't like at school.
 Explore the reasons for "dislikes" (e.g., Are assignments seen as too hard? as uninteresting? Is the youngster embarrassed because others will think s/he does not have the ability to do assignments? Is the youngster picked on? rejected? alienated?)
 Explore other possible causal factors.
 Explore what the youngster and those in the home think can be done to make things better (including extra support from a volunteer, a peer, friend, etc.).

SOME BASIC STRATEGIES

Try new strategies in the classroom – based on the best information about what is causing the problem. Enhance student engagement through (a) an emphasis on learning and enrichment options that are of current greatest interest and which the student indicates (s)he wants to and can pursue and (b) a temporary deemphasis on areas that are not of high interest.

If a student seems easily distracted, the following might be used:

- T** identify any specific environmental factors that distract the student and make appropriate environmental changes
- T** have the student work with a group of others who are task-focused
- T** designate a volunteer to help the student whenever s/he becomes distracted and/or starts to misbehave, and if necessary, to help the student make transitions
- T** allow for frequent "breaks"
- T** interact with the student in ways that will minimize confusion and distractions (e.g., keep conversations relatively short; talk quietly and slowly; use concrete terms; express warmth and nurturance)

If a student needs more direction, the following might be used:

- T** develop and provide sets of specific prompts, multisensory cues, steps, etc. using oral, written, and perhaps pictorial and color-coded guides as organizational aids related to specific learning activities, materials, and daily schedules
- T** ensure someone checks with the student frequently throughout an activity to provide additional support and guidance in concrete ways (e.g., model, demonstrate, coach)
- T** support student's efforts related to self-monitoring and self-evaluation and provide nurturing feedback keyed to the student's progress and next steps

If the student has difficulty finishing tasks as scheduled, the following might be used:

- T** modify the length and time demands of assignments and tests
- T** modify the nature of the process and products (e.g., allow use of technological tools and allow for oral, audio-visual, arts and crafts, graphic, and computer generated products)

TO ACCOMPLISH THE ABOVE: Enhance use of aides, volunteers, peer tutors/coaches, mentors, those in the home, etc. not only to help support student efforts to learn and perform, but to enhance the student's social support network. Encourage structured staff discussions and staff development about what teachers can do and what other staff (mentors, student support staff, resource teachers, etc.) can do to team with teachers in their classrooms to enable school adjustment.

WHAT IF THE ABOVE STRATEGIES DON'T WORK?

If the new strategies don't work, *talk to others* at school to learn about approaches they find helpful (e.g., reach out for support/mentoring/coaching, participate with others in clusters and teams, observe how others teach in ways that effectively address differences in motivation and capability, request additional staff development on working with such youngsters).

After trying all the above, add some tutoring designed to enhance student engagement in learning and to facilitate learning of specific academic and social skills that are seen as barriers to effective classroom performance and learning.

Only after all this is done and has not worked is it time to use the school's referral processes to ask for additional support services. As such services are added, it, of course, becomes essential to coordinate them with what is going on in the classroom, school-wide, and at home.
