August, 2008 (Vol 12 #11)

ENEWS is one of the many resources provided by the School Mental Health Project/ Center for Mental Health in Schools at UCLA. This electronic newsletter is sent to those concerned with enhancing policies, programs, and practices related to addressing barriers to student learning and to promoting mental health in schools. For more on what our federally supported national Center offers, see http://smhp.psych.ucla.edu

We encourage you to forward this to others. If you have been forwarded this ENEWS and want to sign up to receive it directly, please let us know.

EMERGING ISSUE

>Needed: Greater Emphasis in Personnel Preparation for Educators on Addressing Barriers to Learning and Teaching

As recently reported in Education Week, Pennsylvania's Secretary of Education, Gerald L. Zahorchak, argues that state departments of education are the key actors in setting school leadership policy. Yet few of them have offered adequate support to principals in addressing the new school challenges. He suggests several options for states, including setting standards for school leaders and establishing new training requirements.

While few will argue with the need to rethink personnel preparation to better meet the many challenges confronting public education, quite controversial are the matters of what should change and who should guide the changes. For more on this, see the recent Center report: Preparing All Education Personnel to Address Barriers to Learning & Teaching at http://smhp.psych.ucla.edu/pdfdocs/preparingall.pdf

What’s your view on the need to enhance the focus on addressing barriers to learning and teaching in the preparation of teachers, support staff, and administrators? Send your comments to L.taylor@ucla.edu

** NEWS FROM AROUND THE COUNTRY

>SCHOOLS FEEL BUDGET PINCH

Slashed funding and rising costs are forcing school districts to cut back, even close down. Budget shortfalls are resulting in locked-up schools, flurries of pink slips, empty shelves where new books and computers should be. Schools, like other sectors, are caught between skyrocketing prices and dried-up funding streams. 6/24/08. The Christian Science Monitor. http://www.csmonitor.com/2008/0625/p01s01-usgn.html

>THE RENEWED FOCUS ON DROPOUTS

As more accurate data are accruing on the dropout rate across the country (see example below), there are increasing reports indicating that policy makers are beginning to attend to many of the factors that lead to students leaving school and to the personal and societal impact.

>>CA. HIGH SCHOOL DROPOUT RATE FAR HIGHER THAN EXPECTED

California’s first true count of high school dropouts shows that one in four kids quit school last year, which is fare more than state educators estimated before they began
using a new student tracking system. The statewide 24% dropout rate also shows African American and Latino students leaving school at much higher rates than other ethnic groups: 42% of black students and 30% of Latinos quit high school last year. 7/17/08. San Francisco Chronicle.

http://www.sfgate.com/cgi-bin/article.cgi?f=/c/a/2008/07/17/BAS311QATI.DTL&hw=California+Dropout+rate&sn=003&sc=621

>>BRINGING POTENTIAL DROPOUTS BACK FROM THE BRINK
To improve their dropout numbers, districts are taking aggressive steps to keep students in the classroom. These include mentoring programs to help students most at risk of dropout out, identifying children as young as elementary age who are not attending school and may be at risk of dropping out in later years, small alternative programs for students identified as academically at risk because of truancy or disciplinary issues. 6/29/08. The New York Times.

>>KANSAS ENCOURAGES EDUCATION THROUGH COLLABORATION
“What we need is a strategic group to focus on how to get it right now, to take that 3 year old through graduate school, make sure we link what’s happening in schools with real skills.” Gov. Kathleen Sebelius
The Kansas P-20 Education Council [pre-school through graduate school] is a multi-agency coalition that will align all of the state’s educational institutions and decrease the number of students who are “dropping out, falling out or checking out along the way.” 7/3/08. http://www.ktka.com/news/2008/jul/03/sebelius_encourages_education_through_collaboration/

>>CAREER PROGRAMS STRESS COLLEGE TOO
A new kind of high school program known as a career academy has proliferated, especially in low-income districts. A long-term and rigorous evaluation of nine career academies has found that eight years after graduation, participants had significantly higher employment and earnings than similar students in a control group. 6/26/08 The New York Times.

http://www.nytimes.com/2008/06/26/education/26careers.html?_r=1&scp=1&sq=CAREER%20PROGRAMS%20STRESS%20COLLEGE%20TOO&st=cse&oref=slogin

>>TO AVOID STUDENT TURNOVER, PARENTS GET RENT HELP
In some of Flint’s elementary schools, half or more of the students change in the course of a school year. The moves are usually linked to low, unstable incomes. The resulting classroom turmoil led the Michigan State Department of Human Services to start an unusual experiment, paying some parents $100 a month in rent subsidies to help them stay put—a rare effort to address the damaging turnover directly. 6/24/08 The New York Times.

http://www.nytimes.com/2008/06/24/us/24move.html?_r=1&scp=1&sq=TO%20VOID%20STUDENT%20TURNOVER%20PARENTS%20RENT%20HELP&st=cse&oref=slogin

“Students shouldn’t be required to power down to boredom each morning they
arrive a school... If we want more students in school, then we must make it a
journey, not a treadmill.”

Sandy Garrett, Oklahoma State School Superintendent

**THIS MONTH’S FOCUS FOR SCHOOLS TO ADDRESS BARRIERS TO LEARNING**

@##@##@##@##
As schools and districts anticipate the beginning of a new school year, mobilizing returning staff to welcome and support newcomers is an essential ingredient for school improvement. Using first contacts to build networks for support and collaboration is an opportunity not to be missed.

While schools are doing better in providing welcoming and supports for new students and their families, the needs of new staff still tend to be given short shrift. New staff include those who are new to the profession (new teachers, new student support staff, new administrators), those new to the district, and those who are new at each school. As stressed by those concerned with teacher burnout and dropout:

“Proper placement and sound supports for [newcomers] need to be in place as they continue to hone their knowledge and skills. If they continue to work without a net, they will likely turn away from the profession or be less effective than we need them to be, regardless of the quality of their preparation.”

Our Summer quarterly journal/newsletter deals with this in the context of personnel development ( http://smhp.psych.ucla.edu/pdfdocs/Newsletter/summer08.pdf ) as does our recent Center Report entitled: Preparing All Education Personnel to Address Barriers to Learning & Teaching ( http://smhp.psych.ucla.edu/pdfdocs/preparingall.pdf ).

In these documents, we pose a number of questions designed to guide efforts to plan capacity building and support for new staff. For example, we suggest the need to ask: What mechanisms and programs are needed to welcome and support new staff? to provide professional and personal support and guidance to enable new staff to function effectively? And, if the answers are that existing efforts are inadequate, then these must be an expanded focus for school improvement policy and practices.

Other Center resources that may be helpful:

>Is the School Year Off to a Good Start? Online at 
http://smhp.psych.ucla.edu/pdfdocs/goodstart.pdf

This document stresses: “Another school year begins, and the intent is to increase achievement, close the achievement gap, reduce student (and staff) dropouts, ensure schools are safe, enhance well-being, and much more. With these goals in mind, this is the time to review school improvement action plans with an eye to whether what is planned is sufficient and how well plans are being implemented. In doing so, it is especially important to do the review through the lenses of: ensuring all students have an equal opportunity to succeed at school; addressing barriers to learning and teaching; and engaging and re-engaging students in classroom instruction. Using these lenses, consider the following five major concerns that require particular attention at the beginning of a school year. A quick monitoring will indicate how well a school is attending to each.”

>In the Quick Find online clearinghouse, see menu topic Burnout Prevention – 
http://smhp.psych.ucla.edu/qf/burnout.htm

This resource provides links to Center documents, including 
>>School Staff Burnout Prevention (a quick training aid)

**If you have processes in place to welcome new staff and form support networks for all
staff, let us know so we can share your work with others. L.taylor@ucla.edu

Note: In planning for the year, a major focus should be on anticipating major concerns that arise over the course of the school year. Such concerns provide natural opportunities to address potential barriers to learning and teaching in ways that support the school’s mission. As a guide, see the “calendar” of monthly concerns and themes by clicking on “Ideas for Enhancing Support at Your School this Month” which is on the Center’s home page at http://smhp.psych.ucla.edu

As schools, districts, and state departments around the country grapple to prevent and ameliorate the many barriers to effective learning and teaching, there is a growing need to transform policy and practice related to school improvement and personnel development.

In this context, a frequently asked question is: How are pre-service preparation programs for teachers, support staff, and administrators focusing on addressing barriers to learning and teaching?

With a view to clarifying implications for policy and practice related to the National Initiative: New Directions for Student Support, our Center has begun to focus on this matter. To anchor our efforts in the reality of current personnel preparation programs, we are initiating a series of Leadership Institutes for representatives from university departments of education. The first of these was held on Friday, June 27, 2008.

The report from this meeting is online. See Preparing All Education Personnel to Address Barriers to Learning and Teaching at http://smhp.psych.ucla.edu/pdfdocs/preparingall.pdf.

The report is designed both to provide a general conceptual overview and a snapshot of practice considerations and concerns. It begins by reiterating the case for why it is essential to fundamentally and systemically transform how schools (working with families and communities) address barriers to learning and teaching. This is followed by a discussion of the general challenges confronting personnel development for education.

Then, we provide a synthesis of findings gleaned from the Leadership Institute our Center conducted in June 2008 for representatives from university departments of education.

Throughout, the report offers major implications for transforming personnel preparation for teachers, student support staff, administrators, and other stakeholders involved in addressing barriers to learning and teaching. Our intent is to use this report as the beginning of a higher education initiative across the country designed to stimulate discussion, sharing, learning, and systemic changes related to how personnel preparation focuses on addressing barriers to learning and teaching. To this end, we have attached a brief response form. Please take a few minutes to return it to us.

We hope you will forward the report to colleagues to stimulate widespread discussion about these important matters. (The response form also invites you to indicate any other folks to whom you think we should send the report.)

> Updated Resources

The following two documents provide data on the research base supporting the promise of a comprehensive, multifaceted, and cohesive approach to addressing barriers to learning and teaching. The first document is a brief that can readily be shared with policy makers.

**COMMENTS, REQUESTS, INFO, QUESTIONS FROM THE FIELD**

>Regarding last month’s emerging issue: Where do the presidential and congressional candidates stand on improving federal educational policy?

From a colleague:

“Unfortunately, education policy appears to take a back burner to many other policy issues the candidates discuss such as security, defense and the environment. While these are vital issues, education needs to have a more open, specific dialogue. While this burden should lie on the shoulders of the candidates we as educators need to discuss the economic impact of education reform. Cost benefit analysis have been done to some extent in education (I.E. prevention programs, the Perry Pre-School program) but it is not enough to get the attention of policy makers and, more importantly, the electorate. If people knew their rate of return on investing in reform efforts that produced universally accessible, high quality educational programming, they could make a better decision about what programs and policies to support and thus, what to ask candidates.”
