##############################################################

If we reweave the fabric of community
through community courts, through community justice,
through community caring, through community involvement,
we can make a difference."
Janet Reno, Attorney General
##############################################################

________________________________________________________________________

***EMERGING ISSUE***

>>>>Is the Increased Emphasis on Achievement Testing
Causing More Cheating?<<<<

There are many pros and cons about President Clinton's proposed
national testing program. One facet that has not been widely discussed
is whether the increased emphasis on testing would spur more cheating.

According to psychologist Eric Anderman, Ph.D., classrooms that
emphasize high grades and test scores may drive students to cheat.
His study of sixth-, seventh- and eighth-graders suggests that
students who cheat tend to believe that school accentuates academic
ability and performance more than learning. (Journal of Educational
Psychology, 90, 84-93)

"Cheaters thought the purpose of school is to compete and show how
smart you are," says Anderman. "To them, what's most important is
doing better than others and getting the right answer.” Cheaters also worried about school and resorted to self-handicapping behaviors -- blaming others and making excuses for not performing well at school -- more often than their noncheating counterparts. Many of them thought cheating would result in less homework and fewer academic demands. By comparison, noncheaters expressed interest in genuinely learning science concepts. To better understand concepts, they tried various problem-solving methods and sought connections between ideas.

What are your views about all this??????

We will include any responses we receive in the next ENEWS issue and/or on our Website.

***COMMENTS/REQUESTS/QUESTIONS FROM THE FIELD***

<<<<>From Sally McConnell<<<<

In response to last month's emerging issue on Social Promotion, Sally McConnell, National Association of Elementary School Principals (NAESP), Director of Government Relations, suggests reading the following:

* "Link between Computer Use and Achievement is Elusive", NAESP Communicator, November 1997, Vol. 21, No.3

* "President's Perspective, Beyond Social Promotion" by Yvonne Allen, NAESP President. NAESP Communicator, November 1997, Vol. 21, No.3

* "1997-1998 NAESP Platform"

* "Preventing Retention" article by Jim Grant and Bob Johnson, "Principal magazine", May 1997

For more on NAESP views on the matter contact: NAESP, 1615 Duke St. Alexandria, Virginia 22314-8488. Tel (703)684-3345 / Fax (703)548-6021.
From Lisa Santomen

Re: mental health services for deaf in public school & mainstreamed settings.

"I coordinate the counseling services at the Pennsylvania School for the Deaf (center day school) and we have the Partnership Program set up here. This is a program that addresses many mental health needs of our students and families. If you are interested, I'd be happy to E-mail/discuss this further with you!"
E-mail: lsantomen@psd.org

From Kathleen Conway

Through the SBHC Net, she asks about hospitals (private, non-profit hospitals) in local communities (of any size or location) who are involved in school health services or programs. She is specifically interested in what private, non-profit (or profit) hospitals in communities are doing, not just those in a health department (local or state) partnership. She is also, not limiting her question to health CENTERS, but rather to any collaboration that results in some kind of health services or program from a hospital to a school(s).

If you have any information to share with her, please send us a copy as well. Since this is a topic that is frequently asked the center.

Contact Kathleen at KConway1@hfhs.org, or mail to: Kathleen Conway School-Based Health Initiative Henry Ford Health System
One Ford Place, 4A Detroit, MI 48202

Let us hear from you:

Phone: (310) 825-3634
Write: Center for Mental Health in Schools
Department of Psychology, UCLA
Los Angeles, CA 90095-1563

According to a report released on April 12 by the National Center for Education Statistics (NCES)... *No significant change from 1989 to 1995 in the percentage of students who reported having been robbed in school, having property stolen from their lockers or desks or experiencing physical attacks at school. *In 1995, the study showed that 14.6 percent of students aged 12 through 19 reported violent or property victimization at school, compared to 14.5 percent in 1989.

However...

*The percent of students reporting street gang presence at school nearly doubled between 1989 & 1995, from 15.3% to 28.4%. *The percentage of 12 to 19 year old students experiencing a violent crime increased from 3.4% to 4.2%. *The percentage of students reporting that marijuana, cocaine, crack, or uppers/downers were available at school increased from 63.2% to 65.3%.

Single copies of "Students' Reports of School Crime: 1989 & 1995," (NCES 98-241 and NCJ 169607) may be obtained from the BJS fax-on-demand system by dialing (301)519-5550, listening to the menu, and selecting document numbers 107 through 110, by calling the BJS Clearinghouse at 1-800-732-3277 or by calling the National Library of Education at 1-800-424-1616. The report
The cost of special education has risen at a higher rate than that of general education. Studies show that the rate of growth in special education expenditures per special education student is about twice that for general education students. However, much of the cost can be attributed to the implementation of IDEA and the costs associated with expansion of services to eligible children ages birth through 5. One of the current influences on the costs of special education is the growth in special education enrollment. From 1990-1995, the school-age special education count has increased by 12.6%. During the same period, total school enrollment has risen by 7.3%. Some of this growth may be due to socioeconomic factors, such as the increase in poverty among children. Other factors affecting the cost of special education include.

* Changes in the funding agencies and the types of services being provided.
* Revenue restrictions such as property tax restrictions that only limit the growth in general education expenditures, not in special education expenditures.
* Population changes, such as the increase in economically and medically at-risk students, contribute to the rise in special education costs.

From CEC Today, February/March 1998

Disproportionate representation of culturally diverse students in special education is an ongoing problem nationwide. For example, whereas African Americans accounted for 16% of the total student population, students of African American descent accounted for 32% of the students in programs for students with mild mental retardation, 24% of the students in programs for serious emotional disturbance or behavioral disorders, and 18% of students with specific learning disabilities.

To promote greater educational access and reduce inappropriate referrals to special education, a need exists to
* Make available strong academic programs that foster success for all students in general and special education.
* Implement effective and appropriate special education policies and procedures for referral, assessment, eligibility, classification, placement, and re-evaluation.
* Increase the level of home/school/community involvement in the educational process.
* Use community resources to enhance and implement educational programs.

From CEC Today, February/March 1998

>>>>SAMHSA Study Shows the Mental Health Parity is Inexpensive<<<<
http://www.nmha.org/advocacy/alerts/al040298a.html

The Substance Abuse and Mental Health Services Administration (SAMHSA) recently released an independent analysis of mental health parity that shows nondiscriminatory mental health benefits are inexpensive. Specifically, after conducting a comprehensive two year inquiry, the federal agency estimates that full parity benefiting children and adults with mental and substance abuse disorders, "will increase [private health] insurance premiums by 3.6%, on average."

>>>>Telementoring Programs... A New Guide to Online Mentoring<<<<
http://www.ed.gov/pubs/emath

"A growing number of professionals are discovering that they can easily serve as resources to students & teachers without leaving their place of work by participating in programs that allow them to use e-mail to answer questions, tutor & telementor students."
The guide describes some of the existing e-mail based volunteer programs.

Existing E-mail programs fall into three major categories:

>> One-on-one sustained mentor relationships, in which an adult adopts a student for a period of time during which regular contact is made via e-mail.
>> Question & answer services, in which a student can send a subject-related question via Email & have it answered by an adult, who does not necessarily have regular contact with the student.
>> Links to subject knowledge & interactive databases that
supplement classroom activities.

Some featured programs are:
* Electronic Mentoring Project University of Texas at Austin, College of Education
  http://www.tapr.org/4d/infosme.html
  Resource for subject knowledge to supplement classroom activities.

* Hewlett Packard E-mail Mentor Program
  http://www.telementor.org
  One-on-one sustained mentor relationship.

* Learning Through Collaborative Visualization (CoVis)
  http://typhoon.covis.nwu.edu.info.covis-info.html
  One mentor to one student team, sustained mentor relationship

* Mentor Center
  http://mentorcenter.bbn.com
  Ongoing feedback on student work by mentors Project

>>>>>New Journal<<<<

Maternal and Child Health Journal is a new journal that focuses specifically on defining and enhancing the Maternal and Child Health (MCH) field and its role in contributing to the health and well-being of mothers, children and families. Addresses five areas of MCH practice, policy, and research: MCH epidemiology, demography, and health status assessment; innovative MCH service initiatives; implementation of MCH programs; MCH policy analysis and advocacy; and MCH professional development.
Contact: Milton Kotelchuck, editor, Department of Maternal and Child Health, CB #7400, Rosenau Hall, University of North Carolina, Chapel Hill, NC 27599. Phone: (919)966-2010; Fax: (919)966-0458. kotelchuck@unc.edu.

>>>>Guidelines for Psychological Evaluations in Child Protection Matters<<<<

>>>>>From RAND<<<<

* An Ounce of Prevention, a Pound of Uncertainty

By Jonathan Caulkins, Peter Rydell, Susan Everingham, James Chiesa, and Shawn Bushway, 1998. The "ounce of prevention" notion suggests that money invested in drug-use prevention programs will yield handsome future returns. The authors who have previously published works on the economics of criminal-justice issues, use the results of highly regarded school-based drug prevention programs to answer many questions on the issue.

* Investing in Our Children: What We Know and Don't Know about the Costs and Benefits of Early Childhood Interventions

By Lynn A. Karoly, Peter W. Greenwood, and others, 1998. Study details benefits and savings generated by intervention programs and finds that public investment in such programs will benefit not only the children and their families, but also the taxpayers who fund them.

>>>>Statistical Reports by National Center for Education Statistics (NCES)<<<<
Statistical Reports on a number of topics have recently been released by the Department's National Center for Education Statistics (NCES), which is responsible for gathering and reporting statistics on education in the U.S. New publications from NCES can always be found online at http://nces.ed.gov/pubsearch/wnew.idc?1.

Some featured articles are as the following:

* Selected Papers in School Finance, 1996

examines pragmatic education finance issues for school districts and schools. The papers presented in this report include an examination of the implications of a retiring teacher work force for school districts, how school districts respond to fiscal pressures, and an assessment of the financial condition of urban school districts.

* Parent Involvement in Children's Education:
Efforts by Public Elementary Schools

presents the findings from the "Survey on Family and School Partnerships in Public Schools, K-8". Short questionnaires were sent to a nationally representative sample of 900 public schools enrolling kindergarten through eighth grade students.

* Violence and Discipline Problems in U.S. Public Schools: 1996-97

This report presents findings from the Principal/School Disciplinarian Survey on School Violence commissioned by NCES to obtain current data on school violence and other discipline issues in our nation's public elementary and secondary schools.

^^^^^^^UPCOMING INITIATIVES, CONFERENCES, WORKSHOPS^^^^^^^

>>>>>Stand For Children Day  98<<<<

The Parents as Teachers 7th Annual "Born to Learn" Int'l Conference

June 28 - 30, 1998 in St. Louis, MO. The conference offers presentations on the following themes: the latest findings on research, recommended practice and strategies, improving practice to serve families, program management to develop leadership, and child development and common parenting concerns. Contact: Terri Harris, the PAT Center, 10176 Corporate Square Dr., Suite 230, St. Louis, MO 63132; Phone: (314) 432-4330.

1998 National STD Prevention Conference

CALL FOR PROPOSALS AND PAPERS

The National Institute on Drug Abuse (NIDA) is soliciting proposals from qualified organizations having the capability of designing, developing and implementing an evaluation of the process, outcome and impact of the National Youth Anti-Drug Media Campaign. The evaluation consists of a nationally-representative sample of parents and youth to assess the national impact of the campaign; community surveys of parents and youth in 4-to-6 sentinel sites to determine more in-depth examination of the relationships between media exposure and changes in outcomes for parents and children; and the relationship between the campaign and community-based drug abuse prevention and the influence of these activities on outcomes for parents and children. Website: http://web.fie.com/htdocs/fed/nih/gen/any/proc/any/03169825.htm Nancy A. Hurd, Phone: (301) 443-6677; Fax: (301)443-7595 or Web: http://www.nida.nih.gov/RFP/RFPList.html. Email: Kenneth E. Goodling, kg25d@nih.gov.
Creating Community Connections -- 1998 New England Conference...
Call for Presentations

November 18 - 20, 1998 in Newport, Rhode Island. Theme: "Creating Community Connections: Meeting the Behavioral Health Needs of Our Communities". Presented by the Rhode Island Council of Community Mental Health Centers, Inc. and the national Council for Community Behavioral Healthcare. Applications (603)643-2325 E-mail: cb4cma@aol.com.

Grant Program: A.L. Mailman Family Foundation

Deadline: June 1, 1998
Purpose: Support for programs for children and families, with a special emphasis on early childhood. This program is focused on the following areas: Early care and education, family support and moral education and social responsibility

Fifth Biennial National Hartman Conference
on Children and Their Families

Deadline for the proposal: September 1, 1998
Theme: Child and Family Health Care - Issues for the Year 2000 and Beyond Proposals from social scientists, practitioners, and health care professionals for papers, workshops, and roundtables that address this theme are sought. In particular, proposals that discuss promising new approaches for physical and mental health care or justification that a current practice is cost-effective and beneficial. The conference will be held on May 26 -28, 1999 in Mystic, Connecticut.
Contact: Judy Lovelace, Conference Coordinator at childandfamily@cfapress.org or Fax at (860) 442-5909.

Q: What if I'm away from home and I get sick?
A: You really shouldn't do that.
You'll have a hard time seeing your primary care physician.
It's best to wait until you return, and then get sick.
David Lubar, Frequently Asked Questions About Managed Health Care
^^^HELPFUL RESOURCES^^^^

>>>>Psychscapes WorldWide<<<<
http://www.mental-health.com/PsychScapes/home.html

Comprehensive resource of psychology-related material for professionals. Includes database of thousands of upcoming workshops and conferences around the world. Also offers a Therapist Information Network (TIN) which lists more than 900 psychologists, counselors and therapists.

>>>>The Child Survivor of Traumatic Stress<<<<
http://www.unmed.edu/pub/k/kfletche/kidsurv.html

Based on annual newsletter of the same name. Provides information for professionals who work with traumatized children. University of Massachusetts Medical Center.

>>>>Thursday's Child<<<<
http://www.thursdayschild.org/home.htm

Offers a 24 hour help-line, numerous resources on a variety of teen-related topics, and straight talk from teens about their problems. Covers many areas including child abuse, suicide, behavioral problems, relationship issues, eating disorders, and teen parenting.

>>>>Policy Matters<<<<
http://www.policymatters.org

Offers practical prevention ideas for healthier communities and schools; funded by the California Wellness Foundation and operated through the California Center for Health Improvement.

***NEWS FROM OUR CENTER AND OUR SISTER CENTER***

* Our newsletter, Addressing Barriers to Learning (Vol. 3 No. 2) was just mailed out. The lead article is entitled "Enabling Learning in the Classroom: A Primary Mental Health Concern."

Other contents include: discussion of empirically-supported psychological and mental health interventions; a self-study survey instrument related to enabling learning in the classroom; lessons learned about creating a caring school culture.

If you are not on our mailing list and would like to receive a copy, please contact us or access it through our web site.

^^^^NEW ON-LINE RESOURCES^^^ 

*Coming Soon to our web site:
   An Interactive Bulletin Board & Conferencing Area

Over the next week we will establish several conferencing/chat areas for realtime conversations -- interchanges, networking, discussion of issues.

Check the "What's New" section of our web page.
**Report from the Summit on: The Maternal and Child Health Bureau's Initiative for Mental Health in Schools**

A summit was held in Washington DC in March, 1998 to focus on the MCHB initiative for MH in Schools. In attendance were professionals from each of the five state involved, the directors of the two national centers, and others from national organizations with interest in the work. The report outlines the nature of this major initiative implemented by MCHB's Office of Adolescent Health in 1995 and describes the national centers and state projects, explores key similarities and differences, and highlights implications for the future.

**Report from the Steering Committee for the Coalition for Cohesive Policy in Addressing Barriers to Development and Learning**

At the 1997 national summit on addressing barriers to student learning, fundamental concerns were underscored regarding the critical need to fill policy gaps and enhance policy cohesion. This led to a proposal for creation of a policy-oriented coalition of organizations who have a stake in addressing barriers to development, learning, and teaching. In early March 1998, a steering committee meeting was held in DC to formulate a strategic plan for the coalition. The report outlines the coalition's purpose and vision, strategically lays out the first activities, and explores steps for future action. Appendices list participating organizations and some tools to guide analyses of policy related to addressing barriers to development and learning.

Copies of these reports can be ordered from the Center or can be downloaded in PDF format from the Center's web site.

The Center for School Mental Health Assistance (CSMHA) at the University of Maryland at Baltimore, Department of Psychiatry, is a national training and technical assistance center designed to promote the expansion and improvement of mental health services for school-aged children and youth. The CSMHA is directed by Mark Weist, Ph.D. and co-directed by Bernice Rosenthal, M.PH.

Like our center, the CSMHA is supported by the Maternal and Child Health Bureau, Office of Adolescent Health, Health Resources and Services Administration, U.S. Department of Health and Human Services.

WHO ARE WE?

Under the auspices of the School Mental Health Project in the Department of Psychology at UCLA, we have established a Center for Mental Health in Schools. The Project and Center are co-directed by Howard Adelman and Linda Taylor.

Our group at UCLA approaches mental health and psychosocial concerns from the broad perspective of addressing barriers to learning and promoting healthy development. Specific attention is given policies and strategies that can counter fragmentation and enhance collaboration between school and community programs.

We are involved in model development and implementation, training and technical assistance, and policy analysis. Our activities include gathering and disseminating information, materials development, direct assistance, and facilitating networking and exchanges of ideas.

For more information about the Center or about ENEWS, contact Perry Nelson, Judy Onghai, Howard Adelman, or Linda Taylor at
