In wishing you a happy new year, we also are thinking of the many for whom the
year is beginning in a terrible and terrifying way. No matter how far away the
evend, we know that the direct victims of such a vast natural disaster have those
who love them in every country. As students return to schools, some will be
grieving. We encourage everyone to play a role in helping schools enhance efforts to ensure all their students experience the type of caring, supportive, and nurturing environment we all want for our own children. As John Dewey said, “Any other idea...is narrow and unlovely.”

EMERGING ISSUE

>>Is the No Child Left Behind Act undermining the Individuals with Disabilities Education Act?

Reported in the Los Angeles Times (11/28/04): “As teachers and principals throughout California and the country struggle to satisfy the increasing demands of the federal No Child Left Behind law, education experts and school officials say they are paying increasing attention to...students who have fallen just short of test requirements. This new focus on so-called “cusp” or “bubble” students, many experts say, is an unintended consequence of a law that emphasizes test scores and defines success in narrow terms.”

Many concerns have been raised about iatrogenic effects as schools experience increasing pressure to meet the accountability criteria and deadlines of the No Child Left Behind Act. With the reauthorization of the Individuals with Disabilities Education Act, some are concerned that these accountability demands will further undermine schools’ efforts to comply with the IDEA requirements. Principals point out that they increasingly are shifting how they use their limited resources for “supplemental services” (e.g., tutoring). Previously the focus was on the students who were the most behind, including many for whom English is a second language. However, because the test scores of such students are unlikely to increase significantly over a relatively short period, the emerging trend seems to be to focus on “students on the cusp.” That is, the emphasis in providing additional assistance is being viewed in terms of a strategy that invests in those students who are only a bit below criteria and thus are more likely to make essential gains in time for the next testing date. Given sparse resources, concern is raised about whether this means less investment in those with moderate-to-severe learning, behavior and emotional problems.

What do you think about this? How can we guard against such iatrogenic effects? Send your comments to ltaylor@ucla.edu

**NEWS FROM AROUND THE COUNTRY**

*INDIVIDUALS WITH DISABILITIES EDUCATION ACT REAUTHORIZED*

On 12/3/04 the President signed the reauthorized IDEA into law. H. R. 1350, Individuals with Disabilities Education Improvement Act of 2004, can be seen on http://thomas.loc.gov. Reviews and highlights can be seen on the Council for Exceptional Children’s website at http://www.cec.sped.org.

*MANY ABUSED KIDS DON’T GET MENTAL HEALTH SERVICES*

“Young children and those who remained in their homes while authorities investigated potential maltreatment...were found to be less likely to receive mental health services than older children and those placed in group or foster care... About 42% of the children had behavioral and emotional problems that required some type of mental health treatment, but only 28% received such help within a one-year period.” Reuters 12/6/04. (Source Archives of General Psychiatry, 12/04, M. Hurlburt)
*NM GOVERNOR ANNOUNCES INITIATIVE TO DOUBLE SCHOOL-BASED HEALTHCARE CENTERS*

Governor Bill Richardson has announced a plan to double the number of school-based healthcare centers (SBHC) from 34 sites to 68 over the next 12 months. This effort will be helped by a $1 million donation from United Health Foundation.

*U.S.-BORN MEXICAN AMERICANS AND NON-HISPANIC WHITES AT INCREASED RISK FOR PSYCHIATRIC DISORDERS*

NIH News (2/6/04), reporting on an article published in the Archives of General Psychiatry (vol 61, B. Grant, et al) states: “Mexican Americans and Non-Hispanic Whites born in the United States have a higher risk for developing psychiatric disorders than their foreign-born counterparts who have immigrated to the United States... The study findings suggest that acculturation has negative effects on the mental health of both Mexican Americans and Non-Hispanic Whites and that cultural retention (i.e., the preservation of traditional family networks and customs) has protective effects on the mental health of Mexican Americans...”

http://www.niaaa.nih.gov

*OVERALL TEEN DRUG USE CONTINUES GRADUAL DECLINE; BUT USE OF INHALANTS RISES*

Monitoring the Future survey found “In 2004 the proportions indicating any use of an illicit drug in the prior 12 months were 15%, 31%, and 39% in grades 8, 10, and 12, respectively... This year inhalant use continued to increase among 8th graders, and for the first time in recent years increased in the upper two grades as well.” http://www.monitoringthefuture.org

@##@#

“So much about good education rests on what is inside of every student. This includes student motivation, willingness to work hard, to persevere, to focus... Kids, like everyone else, want to succeed. That’s why we have to keep finding ways to affect the inner core of the habits, attitudes, behaviors that determine children’s capacities to do well in school and to get higher test scores.”

    Dorothy Rich

**MONTHLY FOCUS FOR SCHOOLS TO ADDRESS BARRIERS TO LEARNING**

January

    New Year’s Resolutions – A Time for Renewal; A New Start for Everyone

Here are five “resolutions” for support staff and teachers to consider:

1. Resolve to make the first day back special. Greet and welcome each other and each student, especially those who need to be re-engaged in the learning process

2. Resolve to follow through. Be sure to look at a broad range of contributing causes to the problems you are concerned about. Focus on changes in the classroom and school environment that might reduce commonly occurring problems in a cost effective way.

3. Resolve to reach out to create more collaborative and mutually supportive ways to team with others in school, in the district, and in the community.
4. Resolve to develop mutually supportive relationships with families.

5. Resolve to take care of yourself.

For more information on how to turn each of these resolutions into reality, go to http://smhp.psych.ucla.edu and click on "Ideas for enhancing Support at Your School This Month" and scroll down to January. You will see ideas for “Turning Resolutions in Actions” and links to Quick Find resource pages on collaboration, environments that support learning, and much more.

Also see the newly posted Fact Sheet online “What might a fully functioning enabling or learning supports component look like at a school?” at http://smhp.psych.ucla.edu/summit2002/whatmightfully.pdf

See the overview of monthly themes to anticipate and plan most effective use of resources for maximizing the natural opportunities in schools to promote healthy development, build a sense of community, and enhance efforts for prevention. Http://smhp.psych.ucla.edu/pdfdocs/rhythms.pdf

Teacher: “Heat expands and cold contracts. Can you think of an example?”
Student: “In hot weather the days are long, in cold weather the days are short.”

Hard work has a future payoff. Laziness pays off now.

**UPDATES FROM THE TWO NATIONAL CENTERS  
FOCUSD ON MENTAL HEALTH IN SCHOOLS**

Updates from our Center at UCLA

Winter Newsletter is in the mail – Feature article: “Bullying and Addressing Barriers to Learning” includes ways to integrate a focus on bullying into a comprehensive approach to student support. Also includes info on a wide range of resources and online links. Online at http://smhp.psych.ucla.edu/pdfdocs/Newsletter/winter05.pdf

New Materials Online  

>>Quick Find topic page “Mental Health Related Software & Sites” features interactive programs related to a wide range of social and mental health education resources. At http://smhp.psych.ucla.edu/qf/MHmultimedia.htm

Focus on School Boards – New Executive Summary of the Center report: “Restructuring Boards of Education to Enhance Schools Effectiveness in Addressing Barriers to Student Learning” – see http://smhp.psych.ucla.edu/pdfdocs/boardexsumm.pdf This document is designed for members of school boards and others concerned with enhancing school board functioning. We will be sending it to many state and district school board presidents. We encourage everyone to share it with those who might be interested.

New Directions for Student Support Initiative  
>>Working with the state steering committees in CA, IN, WI, and TX, we have adapted the
flyer and brief “Assuring No Child is Left Behind” as state specific documents for each state. To see these materials, go to the Center website at http://smhp.psych.ucla.edu And click on the green circle for New Directions; then see Current Status of the Initiative. We will be sending these state documents to a wide range of school and community stakeholders in these states, and we encourage everyone to share the material with colleagues.

> New flyer on the New Directions for Student Support Summit “Involving all interested parties ...” is online for sharing.  http://smhp.psych.ucla.edu/summit2002/flyerjune04.pdf Highlights the role families, teachers, administrators, school boards, support staff, students, and community stakeholders can play in strengthening learning supports.

>>>Next state summits in New York and Iowa.

> Reconstituted our Advisory Group – Group is expanding and moving toward an increasingly inclusive group. To see the list of exceptional leaders across the nation who have agreed to work with us in advancing policy and practice for mental health in schools, go to http://smhp.psych.ucla.edu/staff.htm

>> “I want you do know about the Updated Directory of Psychiatrists Who Work with Schools that is now available on the American Psychiatric Association website at http://www.psych.org.”

>> Related to last month’s emerging issue “Legislators’ concerns about mental health screening” we received this:

“I am an ex-school teacher who now teaches clinical and developmental psychology to college students. I'm also the spouse of an elementary school teacher, and researcher in developmental psychopathology. I strongly believe in the worth of screening children for depression (as well as other major forms of childhood psychopathology). Childhood depression is not a myth, it is not transitory moodiness, nor is it a minor problem that will disappear if untreated. More so than in adulthood, childhood depression has a variety of associated problems, from academic underperformance and difficulty concentrating, to irritability and social avoidance and lack of motivation. One of the worst effects is that children who are depressed may miss out on crucially important introductions to new academic content, and equally crucial beginning of new social and behavioral expectations (e.g. the start of a new year with a new classroom teacher). First impressions are made badly, and are very hard to overcome.

I do understand why lay persons are reluctant to screen for mental health problems. They don't want to find out what prejudicial problems children may have. Screening will not be cheap. It is not easy to spot depression unless you have training so it is easy to overlook. Screening may become another unfunded mandate. Screening may appear to take away parental prerogatives. Screening may be thought of as leading to mandatory medication (we have the terrible ADHD publicity to thank for that). Screening may be believed to stigmatizing children - especially if the policy makers hold such prejudices themselves.

The key to dealing with such concerns is to bring them out in the open, determine what exactly the opposition is based on, and educate the persons about the realities of screening and failing to screen. Both my husband and I have had a good experience with persuading reluctant parents if their concerns can be identified, and respectful corrective information supplied. That is also the approach that needs to be taken with policy makers who are opposed to screening, or who have not yet formed an opinion.”

Note: The emerging issues and responses are online on the Center website at http://smhp.psych.ucla.edu. Click on Net Exchange. If you want to add your response to any of
the issues or practitioner concerns, send them to ltaylor@ucla.edu.

THIS IS THE END OF THIS ISSUE OF ENEWS
Below is a brief description of our Center at UCLA For more see our website at http://smhp.psych.ucla.edu.

Who Are We?

Under the auspices of the School Mental Health Project in the Department of Psychology at UCLA we established a Center for Mental Health in Schools in 1995. The Project and Center are co-directed by Howard Adelman and Linda Taylor.

As sister Centers, the Center at UCLA and the one at the University of Maryland provide support (training and technical assistance) for mental health and psychosocial concerns in schools.

Our group at UCLA approaches mental health concerns from the broad perspective of addressing barriers to learning and promoting healthy development. Activities include gathering and disseminating information, materials, development, direct assistance, facilitating networking and exchanges of ideas, and strategic efforts to advance the field. We demonstrate the catalytic use of technical assistance, internet publications, resource materials, and local, state, regional, and national meetings to stimulate interest in program and systemic change.

Specific attention is given to policies and strategies that can (a) counter fragmentation and enhance collaboration between school and community programs, and (b) counter the marginalization of mental health in schools. Center staff are involved in policy and program analyses, model development and implementation, and capacity building. We focus on interventions and range from systems for healthy development and problem prevention through treatment for severe problems and stress the importance of school improvement and systemic change. There is an emphasis on enhancing collaborative activity that braids together school and community resources. The Center works to enhance network building for program expansion and systemic change and does catalytic training to stimulate interest in such activity. We connect with major initiatives of foundations, associations, governmental, and school and mental health departments.

Evaluations indicate the Center has had considerable impact in strengthening the network of professionals advancing the field of mental health in schools and in changing policies and practices.
