**EMERGING ISSUE

>>>Have Professionals Been too Mute About the Expanding Use of Psychotropic Drugs with Young Children?
In the Summer 2003 issue of the newsletter for the American Psychological Association's Society of Clinical Psychology, the Society's president, Diane Willis, states there has been an inappropriate and increasing over-medication of children 12 years of age and under. She goes on to point out that professionals have contributed to the problem in several ways -- including their failure "to adequately inform the public and convince managed care companies about the efficacy and benefits of psychological interventions for young children and their families." As a proponent for expanding prescription privileges to psychologists, Willis' voicing of such concerns is particularly noteworthy. However, given that the trends have been reported for some time, we wonder whether her comments are a harbinger of a new surge of attention to the matter or just another commentary that will fail to stimulate critical discussion.

What do you think about all this? We look forward to your comments.

Send your response by email to: smhp@ucla.edu and we will post it on our website's Net Exchange (http://smhp.psych.ucla.edu) page for others to read and respond.
Or you can respond by phone (310/825-3634) or by fax (310/206/8716)

**NEWS FROM AROUND THE COUNTRY**

**TARGETED SUPPORTS HELPS STUDENTS WITH "BEHAVIORAL/EMOTIONAL DISORDERS"**

A new report from the Bazelon Center for Mental Health Law indicates that when appropriate support is used school-wide there is a decrease in aggressive behavior and a concomitant reduction in the number of suspensions and expulsions for "emotionally disabled" students. Project ACHIEVE is cited as an example.
Online at (http://www.bazelon.org)

**REAUTHORIZATION OF IDEA MOVES FORWARD**

Similar to the House's version, the bill introduced in the Senate authorizes school districts to use up to 15% of their IDEA funds for support services to help students not yet identified with disabilities but who require additional academic and behavioral support to succeed in a general education environment. The bill also encourages parent and community training info centers to focus on improving parent-school collaboration. (http://gregg.senate.gov/press/press061203.pdf)
For regular updates and analyses of the progress through Congress or this and other bill's related to mental health in schools, see (http://www.nasponline.org/advocacy/legisup060603.html)

**CHILD HEALTHCARE CRISIS RELIEF ACT**

The U. S. Bureau of Health Professions projects that by 2020 the demand for children' mental health services will double. Since the number of child and adolescent health professionals is not expected to increase, major deficits in service delivery will result -- http://thomas.loc.gov. Thus, bills have been introduced in the U.S. House (HR 1359) and Senate (S 1223) to provide educational incentives as a way of increasing the number of child and adolescent mental health professionals.

**UNDER NO CHILD LEFT BEHIND STUDENTS MAY TRANSFER, BUT WHERE TO?**

More than 125,000 Chicago Public School students are eligible to transfer from their school next year, however the sheer number means options are limited. Schools that are overcrowded will not have to take new students. Also, students
will be required to move within their geographic area. Last year 29,000 students from 50 schools could transfer; only 1,165 took the option. (Chicago Tribune, 6/17/03)

**POLICE OFFER DRUG TEST KITS TO PARENTS**

Police in Lansing, Michigan initiated a program to provide parents with free drug tests for a period of 30 days. After that period, tests will be available for a cost of $3 or $12 depending on the test. The urine tests screen for cocaine, marijuana, Ecstasy, methamphetamine, morphine, and PCP. There is a separate test for alcohol. (Lansing State Journal, 6/11/03)

**DISTRICT RESTORES TEACHERS AND PROGRAMS**

The superintendent of public schools in Buffalo, New York announced the restoration of interscholastic sports, instrumental music, some extra-curricular activities, and the recall of 173 teachers and 64 aides. This is the result of prudent fiscal management that resulted in reviews of the district's state building aid claims dating back to 1990 and that identified opportunities to claim additional funds for previous years. In addition, district officials expect to receive increases in federal grants. (http://www.buffaloschools.org)

**CONSEQUENCE OF SCHOOL BEHAVIOR IS LOSS OF DRIVER'S LICENSE**

Louisiana House Bill 1686 would revoke the license of a student who is expelled or suspended for at least 10 days for certain violations: selling or possessing drugs, having alcohol or a gun on school property or at a school event or attacking a teacher or staff member. The Senate amendments include a hardship provision that would allow students to continue driving to school, counseling, or work. (The Times Picayune, 6/12/03)

**HEAD START UNDER FIRE**

According to a report by the U. S. Department of Health and Human Services: "Head Start children are not adequately prepared for school, and those who have been in the program still enter kindergarten lagging far behind the typical American child in skills needed for school readiness." The report does acknowledge that "Head Start children benefit from increased social skills as well as the comprehensive health and other benefits delivered through the program.... The report also cites the importance of coordinating existing programs to improve services for families and children...." It recognizes that "historically, the system of early care and education in the United States has been fragmented. Child care programs and early education programs have existed separately and have separate goals. Greater collaboration and coordination is needed among state and federal programs serving children ages 0 - 5 to ensure that all children entering kindergarten are ready to learn."

The Bush administration proposes "authorizing states willing to meet specific programmatic and financial requirements to take over administration of Head Start programs in their state, enabling them to better coordinate Head Start and other preschool efforts." (http://www.aspe.hhs.gov/hsp/StrengthenHeadStart03/index.htm) A U. S. House subcommittee plan proposes that eight states be involved in a trial block grant program for Head Start while the rest remain under federal control.

In a related story reported in the Washington Post (6/13), the National Head Start Association filed a federal lawsuit against the Bush Administration for allegedly violating the First Amendment rights of Head Start teachers and parent volunteers.
The association says the administration tried to stop teachers and parents from protesting the changes by suggesting in a letter that those teachers were violating federal law by participating in political activities.

(Note: see our website's "What's New Page", for a current news item posted each week.)

%%%% We want to coordinate resources at our school but can't because the district doesn't...
%%%% We want to coordinate resources in our district but can't because the state doesn't...
%%%% We want to coordinate school programs in our state but can't because the feds don't...
%%%% We can't coordinate resources sent to schools at the federal level because schools are locally controlled...

THIS MONTH'S FOCUS FOR SCHOOLS TO ADDRESS BARRIERS TO LEARNING

"Using 'Down Time' to Plan Better Ways to Work Together in Providing Learning Supports"
In many schools and districts, July is "down time." (For year-round schools, intersessions are comparable times.) Down time provides an opportunity to plan new ways of providing and enhancing supports for students learning. Such periods also allow for special training opportunities. To see specific ideas related to all this, go to the Center website and click on "Ideas for Enhancing Support at Your School This Month" (http://smhp.psych.ucla.edu)

"The solution of the adult problems tomorrow depends in large measure upon the way our children grow up today. There is no greater insight into the future than recognizing when we save our children, we save ourselves.”
Margaret Mead

NEWS FROM THE TWO NATIONAL CENTERS FOCUSING ON MENTAL HEALTH IN SCHOOLS

Updates from our Center at UCLA

NEW DIRECTIONS FOR STUDENT SUPPORT

All summit related material is online. The website Summit's info can be accessed by clicking on the green circle on the Center's homepage http://smhp.psych.ucla.edu. Feel free to download and share info with others. Various documents can be used in planning summer trainings for student support to enhance effectiveness when the new school year starts. For example, see "Guidelines for a Student Support Component." This document should be shared widely as a vision for support services and a stimulus for advancing the work (e.g., developing guidelines and quality indicators). The main areas covered are:
1. Major Areas of Concern Related to Barriers to Student Learning
2. Timing and Nature of Problem-Oriented Interventions
3. General Domain for Intervention in Addressing Students’ Needs and Problems
4. Specialized Students and Family Assistance (Individual and Group)
5. Assuring Quality of Intervention
6. Outcome Evaluation and Accountability.

A copy of the Guidelines was in the last hardcopy newsletter (Spring, 2003) which is online. If you didn't receive it, or want additional copies to share, let us know. (Email: smhp@ucla.edu)

Several states have indicated interest and plans are being made for State
Summits on New Directions for Student Support. Let us know if you think your state is ready to begin discussing a summit.

> New Introductory Packet--Transitions: Turning Risks into Opportunities for Student Support. The document covers research and best practices. It explores why transitions are dangerous opportunities that can disrupt or promote development. Key transitions and related intervention strategies are presented for starting school; daily transitions including before and after school as well as recess and lunch; year transitions such as beginning a new school year; moving to a new school/new country; transitions for special needs students; and transitions from high school. The importance of support staff, families and students planning for transitions is accompanied by suggestions and models. Resources include references, organizations, website, and Center materials related to transitions. We have also included an endnote on sustaining innovations. To download from our website, go to http://smhp.psych.ucla.edu and click on Center Materials.

> Updated materials on Suicide Prevention. A powerpoint presentation with accompanying script on suicide prevention has been prepared by the Center for anyone to use in training. Go to http://smhp.psych.ucla.edu and click on What's New.

> THIS MONTH'S IDEAS FOR ENHANCING SUPPORT AT YOUR SCHOOL

We now have monthly themes for 11 of the 12 months of the year designed to anticipate the "season" or rhythm of the school year. The focus for July is "Using 'Down Time' to Plan Better Ways to Work Together in Providing Learning Supports." The month of July in many schools provides an opportunity to stop and think long enough to plan better ways of doing things in the upcoming school year. Knowing there are cyclic demands that we can anticipate in a school year helps to anticipate, plan, and provide proactive interventions for prevention. But who does all this planning? Building an learning support component starts with an infrastructure that allows support staff to work together on a regular basis. For ideas on establishing a resource mechanism at your school, see the July theme at http://smhp.psych.ucla.edu "Ideas for Enhancing Support at Your School this Month."

LET US KNOW WHAT YOU NEED. New resources can be developed and best practices identified. Also, let us know about the latest and greatest you encounter so we can update our resources and your colleagues across the nation.

^ ^ ^ ^ UPDATES FROM OUR SISTER CENTER

The Center for School Mental Health Assistance at the University of Maryland at Baltimore will hold its 8th National Conference on Advancing School Based Mental Health Programs, October 23-25, Portland, OR

See their website (http://csmha.umd.edu) Or contact Mark Weist, Director, Center for School Mental Health Assistance, University of Maryland at Baltimore, Department of Psychiatry, 680 W. Lexington St., 10th fl., Baltimore, MD 21201.
Phone (888) 706-0980, Email: csmha@umpsy.umd.edu
In the June 26, 2003, edition of CASEL Connections see http://www.casel.org, the emphasis is on the problem of choosing from "practices that have been empirically shown to achieve the desired outcomes." Recognizing that this is a complicated issue when it comes to complex interventions, they recommend looking at Lisbeth Schorr's (2003) thoughtful discussion entitled: "Determining 'what works' in social programs and social policies: Toward a more inclusive knowledge base." See: http://www.brook.edu/dybdocroot/views/papers/sawhill/20030226.pdf This work discusses shortcomings of prevailing approaches and explores alternative approaches when interventions do not permit random assignment. Offers a concrete example of the "design-research approach" Schorr and her colleagues use to generate info for improving community-change initiatives. (For more on the work of Schorr and her colleagues related to what they are calling the Pathways Mapping Initiative, see http://www.pathwaystooutcomes.org.)

CASEL also draws attention to the "What Works Clearinghouse." Institute of Education Sciences, U.S. Department of Education http://www.w-w-c.org/about.html

This clearinghouse was created by the U.S. Dept of Education to provide "a central, independent, and trusted source of evidence of what actually works in education." Seven topic areas have been chosen for systematic review in the first year of operation.

> Interventions for Beginning Reading
> Curriculum-Based Interventions for Increasing K 12 Math Achievement
> Programs for Preventing High School Dropout
> Programs for Increasing Adult Literacy
> Peer-Assisted Learning in Elementary Schools: Reading, Mathematics, and Science Gains
> Interventions to Reduce Delinquent, Disorderly, and Violent Behavior in Middle and High Schools
> Interventions for Elementary School English Language Learners: Increasing English Language Acquisition and Academic Achievement

**REQUESTS/INFO/COMMENTS/QUESTIONS FROM THE FIELD

Request for Comments:

It was suggested that views be solicited about a controversial law 
(in California) that bans children from being surveyed in school 
about sex, morality, or religion unless their parent fills out a 
permission form. Legislation has been proposed to make it easier 
to gather anonymous info from students about "sensitive topics."

For more info and published comments on all this, see
  http://www.sacbee.com/content/politics/story/6772097p-7722930c.html
  http://www.welchreport.com/bnews2.cfm?rank_cho=799
  http://www.insidevc.com/vcs/opinion_columnists/article/0,1375,vcs_223_1993971,00.html

Weigh in with your info and comments -- send to smhp@ucla.edu.

Shared Info:

>>>The third safe schools document Safe Supportive and 
Successful Schools: Step by Step, (Osher, Dwyer & Jackson) will 
be published by Sopris West (CO) in September, 2003. The 
document's package will include a CD containing Early Warning 
Timely Response: A Guide to Safe Schools and Safeguarding Our 
Youth: An Action Guide and the award-winning video of actual 
exemplary programs. The complete and comprehensive package 
will enable users to reprint forms for program planning and 
implementation and to contact program developers for prevention, 
early and intensive interventions for children and youth to improve 
social-emotional learning, resiliency and reduce emotional, 
academic mental and behavioral problems. Some of the content is 
available for selected review. Those interested may contact 
edwayer@aol.com or dosher@air.org

>>>Montgomery County Public Schools (Maryland) and Health
Department are co-sponsoring a three school pilot project using the successful schools model of implementing prevention, early and intensive interventions in a real partnership between school student services mental health staff and clinical staff with full school and family involvement in the planning and implementation. The project ranging from k-12 grades started in January with braided funds and resources. For more info, contact ekdwyer@aol.com.

Responses to Last Month's Emerging Issue

"Does drug testing at school deter student drug use?"

"As a teacher and as a parent I am not surprised that drug testing in the schools has little effect on drug use in teens. I also believe that beginning drug programs at the elementary level only increases the curiosity of students, which leads to more use and use at a younger age. Has anyone researched this?"

"The best way to deter drug use is to teach the students why half of those who abuse drugs do so. National studies agree that 50% of those who abuse substances do so to get relief from common, untreated mental illnesses. Without proper medical treatment with proper medications...symptoms of mental illness are somewhat, and temporarily, alleviated...The medical profession refers to this as "self-medication..."

Anything you would like to share? Send it to us at smhp@ucla.edu.

"Fanaticism consists of redoubling your efforts when you have forgotten your aim."

@#@#@##@#@##@##@#@##@#@##@#@##@#@##@#@##

THIS IS THE END OF THIS ISSUE OF ENEWS
Below is a brief description of our Center at UCLA for more see our website http://smhp.psych.ucla.edu

@#@#@##@#@##@##@#@##@#@##@#@##@#@##@#@##

Who are we?
Under the auspices of the School Mental Health Project in the Department of Psychology at UCLA we established a Center for Mental Health in Schools in 1995. The Project and Center are co-directed by Howard Adelman and Linda Taylor.

As sister Centers, the Center at UCLA and the one at the University of Maryland provide support (training and technical assistance) for mental health and psychosocial concerns in schools.

Our group at UCLA approaches mental health concerns from the broad perspective of addressing barriers to learning and promoting healthy development. Activities include gathering and disseminating information, materials, development, direct assistance, and facilitating networking and exchanges of ideas. We demonstrate the catalytic use of technical assistance, internet, publications, resource materials, and regional and national meetings to stimulate interest in program and systemic change. Specific attention is given to policies and strategies that can (a) counter fragmentation and enhance collaboration between school and community programs, and (b) counter the marginalization of mental health in schools. Center staff are involved in model development and implementation, training and technical assistance, and policy analysis. We focus on interventions that range from systems for healthy development and problem prevention through treatment for severe problems and stress the importance of school improvement and systemic change. There is an emphasis on enhancing collaborative activity that braids together school and community
resources. The Center works to enhance network building for program expansion and systemic change and does catalytic training to stimulate interest in such activity. We connect with major initiatives of foundations, associations, governmental, and school and mental health departments. Evaluations indicate the Center has had considerable impact in strengthening the network of professionals advancing the field of mental health in schools and in changing policies and practices.

For more information about the Center or about ENEWS, contact Center Coordinator Perry Nelson or Center Co-Directors Howard Adelman and Linda Taylor at: UCLA, School Mental Health Project/Center for Mental Health in Schools Box 951563 Los Angeles, CA 90095-1563 Phone (310) 825-3634 Fax (310) 206-5895 email: smhp@ucla.edu -- Website: http://smhp.psych.ucla.edu
