**Emerging Issue**

Does Drug Testing at School Deter Student Drug Use?

Lloyd Johnston and colleagues at the University of Michigan have reported the first major study (76,000 students nationwide) on the impact of drug testing in schools. They conclude such testing does not deter
student drug use any more than doing no screening at all. (For the story, see the What's New on our Center website and click on "This Week's News Item & Links to the latest news on mental health issues."

Based on the study's findings, Dr. Johnston states "It's the kind of intervention that doesn't win the hearts and minds of children. I don't think it brings about any constructive changes in their attitudes about drugs or their belief in the dangers associated with using them." At the same time, he stresses "One could imagine situations where drug testing could be effective, if you impose it in a sufficiently draconian manner - that is, testing most kids and doing it frequently. We're not in a position to say that wouldn't work." Graham Boyd, Director of the ACLU Drug Policy Litigation Project who argued against drug testing before the Supreme Court last year said, "In light of these findings, schools should be hard-pressed to implement or continue a policy that is intrusive and even insulting for their students." But other researchers contend that the urinalysis conducted by schools is so faulty, the supervision so lax and the opportunities for cheating so plentiful that the study may prove only that schools do a poor job of testing. Also noted is that the Michigan study does not differentiate between schools that do intensive, regular random screening and those that test only occasionally. As a result, it does not rule out the possibility that the most vigilant schools do a better job of curbing drug use.

Where do you stand on this? We look forward to your comments.

**NEWS FROM AROUND THE COUNTRY**

STUDY SUGGESTS THAT DRUG TESTING DOESN'T DETER DRUG USE

Researchers at the University of Michigan report that about 19% of American secondary schools have some form of student drug testing and that there are virtually identical rates of drug use in the schools that have drug testing and the schools that do not. See University of Michigan news release – http://www.umich.edu/news/Releases/2003/May3/r051903.html

CHILD MEDICATION SAFETY ACT OF 2003

The U.S. House of Representatives passed HR 1170 on May 21st and sent it on to the Senate. The Bill's stated intent is "To protect children and their parents from being coerced into administering psychotropic medication in order to attend school." It directs the Secretary of Education to see that each state has developed and implemented policies and procedures to comply. http://thomas.loc.gov

MICHIGAN'S SAFE SCHOOL CHOICE POLICY

States are moving to meet the requirement of the No Child Left Behind Act that would allow students to transfer from "persistently dangerous" schools. Michigan's has adopted the following criteriaschools where, for three consecutive years, more than 2.5 percent of pupils have been expelled for more than 10 consecutive days (for arson, physical assault, bomb threats, criminal sexual conduct, possession of a dangerous weapon) or at least five students enrolled in the school self-report that they have been victims of a violent crime. Incidents must occur at school. (http://www.michigan.gov/documents/State_Board_News_Release_-_April_24__2003_62798_7.doc)

RESEARCHERS FIND PLACEBOS AND LOW DOSES OF MEDICATION EFFECTIVE
A study sponsored by researchers at the University of North Carolina at Chapel Hill reported that 40% of children with ADHD did just as well when placebos replaced some of their medications. They suggest that using placebos could be used in treating not only ADHD but other disorders, reducing medication side effects. Based on these findings the National Institute of Mental Health is sponsoring further research along these lines.

HEALTH CARE COSTS OF BEHAVIORAL DISORDERS

Researchers at the Children's Hospital of Philadelphia and the University of Pennsylvania found that 7% of 2 to 18 year old CHOP patients were identified with a behavioral disorder. These children incurred greater expenditures than healthy children ($1,468 vs. $710). Costs were similar to those of children with physical disorders. Overall expenditures for children with depression and anxiety were double that of children with disruptive disorders such as ADHD, conduct, ODD (mainly a result of increased hospitalization expenditures).

SCHOOL CHOICE NOT AN OPTION FOR ALL

A report by the Boston Foundation found that, while choices exist for many, school entitlements and opportunities are unevenly and inequitably distributed, and significant unmet demand remains. Further, those who are most at risk – lower-income, minority students – have fewer school choice options than others. That is, family income and where they live often stop families from taking part in choice programs (private, charter, vocational, desegregation). Although 25% of Massachusetts 1 million public school students participate in the choice programs, low-income and minority students face barriers that keep them out of these programs.

EVALUATION OF HIGH SCHOOL EXIT EXAM

The Human Resources Research Organization report on the California High School Exit Exam finds many instructional and remedial courses have limited effectiveness in helping students master the required standards. The report suggests inadequate student motivation and lack of strong parental support may play contributing roles in limiting the effectiveness of these courses. The State Board of Education in reviewing the report voted to postpone the test as a graduation requirement for up to three years. Only about 60% of the students in the class of 2004, the first cohort that was required to pass in order to graduate, have passed the math portion of the test.

KENTUCKY LEGISLATION DESIGNED TO AWARD GRANTS FOR ENRICHMENT

Kentucky's SB 154 states“"The General Assembly finds and declares that the integration of the arts and foreign languages into the school curriculum benefits students by increasing their motivation to learn; improves attendance; fosters multicultural understanding; and develops neurological cognitive potential through higher order thinking skills, creativity, and problem solving.”
http://www.lrc.state.ky.us/RECORD/03RS/SB154/bill.doc

(Notesee our website What's New, for a current news item posted each week.)

=================================

"America is the land of second chances. A punitive, test-driven society that encourages young people to drop out of school isn't what this country is all about. American education has taken a lot of people who looked like losers in Act I of their lives and turned them into winners by Act III. In this great drama, schools aren't just props or part of the scenery. They're the essential story line. We still have time to make sure the story has a happy ending."

James Harvey
THIS MONTH'S FOCUS FOR SCHOOL TO ADDRESS BARRIERS TO LEARNING

Each month on our website we feature a special focus on enhancing student support at schools. June's topic is "Summer and the Living Aint Easy." For many students, teachers, support staff and administrators, summer vacations are a think of the past. It is essential to recognize what that means and look for the opportunities to attend to students at risk. For tools, guidelines, and resources on using the summer productively, see the Center's home page and click on "Ideas for Enhancing Support at Your School This Month" (http://smhp.psych.ucla.edu)

"...we need to find out what excites kids about learning, and find out how to guide them and show them how to connect to the real world. We need to value that kind of learning.”
Ray McNulty

CALL FOR ABSTRACTS FOR CONFERENCES

>>Association of Maternal and Child Health Programs calls for abstracts for its 2004 conference, Feb 28-Mar 3, Washington, DC. Title of the Conference is Mental Health – Promoting a New Paradigm for Materials and Child Health Public Health Practice. Deadline June 15. Email 2004abstracts@amchp.org

CALL FOR FEEDBACK

>>The Social Security Administration is asking interested people and organizations to review the update on rules used to evaluate mental disabilities in adults and children who apply for social security disability benefits or supplemental security income payments. SSA is also calling for ideas on improving programs for people with mental disorders. Comments must be sent in by June 16 (http://policy.ssa.gov/pnpublic.nsf/LawsRegs)

"There are two kinds of people, those who do the work and those who take the credit. Try to be in the first group; there is less competition there."

Indira Gandhi

NEWS FROM THE TWO NATIONAL CENTERS FOCUSING ON MENTAL HEALTH IN SCHOOLS

Updates from our Center at UCLA

>IMPACT EVALUATION REPORT 2003 – The most recent data on our Center's impact is now online. (We are pleased to note that the findings are extremely positive.)

>MIDWEST REGIONAL SUMMIT "New Directions for Student Support" was held in Chicago, May 23rd. Leaders from midwest states came together to share experiences and develop strategies regarding

>>Why it is imperative to pursue New Directions for Student Support
>>Ways to Rethink Use of Resources (Programs, Personnel, etc.)

Some also shared their pioneering work related to moving in new directions. For example, a team from the Madison Public Schools (WI) shared their comprehensive framework which significantly strengthens prevention and early intervention through redeploying resources. District leaders from Detroit Public Schools shared info on the re-activation of school Resource Coordinating Teams. Many of the participants are now ready to pursue state summits for New Directions for Student Support.

The initiative continues

>>> A West Regional Summit is in the works for the fall.
>>> We have launched an outreach mailing campaign to mobilize interest in New Directions for Students Support; info already has been sent to 4,300 superintendents, directors of student support services, Title I coordinators, and Special Education Directors at state departments and school districts.
For info on the Summits Initiative go to our website at http://smhp.psych.ucla.edu and click on the green circle "Summits ..." If you are interested in participating in this initiative, Email smhp@ucla.edu.

>THIS MONTH'S IDEAS FOR ENHANCING SUPPORT AT YOUR SCHOOL

Each month we compile ideas and activities to support students, families, and staff that fit the "season" or rhythm of the school year. The focus for June is "Summer and the Living Aint Easy." This monthly website feature and other tools, guidelines, and resources to support summer learning can be accessed at http://smhp.psych.ucla.edu.

>MATERIALS AVAILABLE ONLINE AND IN HARD COPY

>>>Working CollaborativelyFrom School-Based Teams to School-Community-Higher Education Connections – Provides guidelines and tools for building, maintaining, and sustaining effective collaboratives

>>>If you haven't received it yet, the hard copy of our Spring, 2003, Newsletter is in the mail and online. Contents include

>>>>"Safe Students/Healthy SchoolsA Collaborative Process"
>>>>"Assessing whether a student might commit a violent act"
>>>>"Mental Health in SchoolsUsing the data"
>>>>"Mental Health of SchoolsSchool Climate"
>>>>"New directions for student support are essential to leaving no child behind."

>>>Also see the special insert "Guidelines for A Student Support Component." These guidelines include

#Major area of concern related to barriers to student learning
#Timing and nature of problem oriented interventions
#General domains for intervention in addressing students' needs/problems
#Specialized Students and Family Assistance
#Assuring Quality of Intervention
#Outcome Evaluation and Accountability

Feel free to adapt and use the guidelines in your work. Contact us if you want copies.

If you aren't receiving the hardcopy newsletter and want it, contact smhp@ucla.edu.

LET US KNOW WHAT YOU NEED. New resources can be developed and best practices identified. Also, let us know about the latest and greatest you encounter so we can update our resources and your colleagues across the nation.

**REQUESTS/INFO/COMMENTS/QUESTIONS FROM THE FIELD**

We are receiving many requests regarding evaluation strategies to show the effectiveness of school based mental health in improving outcomes for all students. This is a recent example:

“I need help with structured assessment to be used as pre and post measurements that can be used by school staff and/or school mental health professionals. What measurements are being used now in other school mental health programs?"

We provided an initial response to this in the 5/27/03 weekly Mental Health in Schools Practitioner Listserv. We elicited additional feedback from leaders in the field and will include their responses in the 6/9/03 MH in Schools Practitioner Listserv. (Each week the most recent Practitioner's Listserv dialogue is included under "What's New" on the Center website.) If you are interested in sharing in this dialogue on a regular basis, sign up for the MH in Schools Practitioner Listserv by contacting smhp@ucla.edu. Or go to the website Net Exchange at http://smhp.psych.ucla.edu and post your ideas and suggestions.

"Children are unpredictable. You never know what inconsistency they're going to catch you in next."

^ ^ ^ TRAINING AND JOB OPPORTUNITIES

<Mental Health Worker>
St. John's Well Child and Family Center, Los Angeles, CA, seeks a bilingual licensed mental health worker (MFTC, LCSW) to lead a community based mental health program with a special focus on youth. Contact Jim Mangia, FAX 213-749-7354.

<School Social Worker>
Dolton District 148, Dolton, IL, to serve grades K - 6. Deadline August 26. Contact Kaminskis@sd148.5-cook.k12.il.us

<Postdoctoral Position>
A research training program focusing on health behavior research in minority pediatric populations has two post-doctoral positions available. Supported by a research training grant from NIH, the interdisciplinary faculty include pediatric health psychologists, pediatricians, and biostatisticians. Positions for qualified individuals with an APA-approved Ph.D. and internship in child clinical or pediatric health psychology are available beginning summer, 2003. Inquiries may be directed to program co-directors Alan Delamater (adelamater@med.miami.edu) or Annette La Greca (alagreca@miami.edu).

FOR MORE INFORMATION ON EMPLOYMENT OPPORTUNITIES, SEE http://smhp.psych.ucla.edu. Go to Contents, scroll down to Jobs. Following the listing of current openings, you will see links to HRSA, SAMHSA, and other relevant job sites.]

Who are we?
Under the auspices of the School Mental Health Project in the Department of Psychology at UCLA we established a Center for Mental Health in Schools in 1995. The Project and Center are co-directed by Howard Adelman and Linda Taylor. The UCLA Center is one of two national centers. As sister Centers, the Center at UCLA and the one at the University of Maryland provide support (training and technical assistance) for mental health and psychosocial concerns in schools.

Our group at UCLA approaches mental health concerns from the broad perspective of addressing barriers to learning and promoting healthy development. Activities include gathering and disseminating information, materials, development, direct assistance, and facilitating networking and exchanges of ideas. We demonstrate the catalytic use of technical assistance, internet, publications, resource materials, and regional and national meetings to stimulate interest in program and systemic change. Specific attention is given to policies and strategies that can (a) counter fragmentation and enhance collaboration between school and community programs, and (b) counter the marginalization of mental health in schools. Center staff are involved in model development and implementation, training and technical assistance, and policy analysis. We focus on interventions that range from systems for healthy development and problem prevention through treatment for severe problems and stress the importance of school improvement and systemic change. There is an emphasis on enhancing collaborative activity that braids together school and community resources. The Center works to enhance network building for program expansion and systemic change and does catalytic training to stimulate interest in such activity. We connect with major initiatives of foundations, associations, governmental, and school and mental health departments. Evaluations indicate the Center has had considerable impact in strengthening the network of professionals advancing the field of mental health in schools and in changing policies and practices.

For more information about the Center or about ENEWS, contact Center Coordinator Perry Nelson or Center Co-Directors Howard Adelman and Linda Taylor at UCLA, School Mental Health Project/Center for Mental Health in Schools Box 951563 Los Angeles, CA 90095-1563 Phone (310) 825-3634 Fax (310) 206-5895 emailsmhp@ucla.edu -- Website http://smhp.psych.ucla.edu
