**Comments, requests, information, questions from the field
**Critical Concern**

**Too Many Schools Haven’t Mapped and Analyzed Student and Learning Supports**

As part of the 2015 National Initiative to Transform Student and Learning Supports, last week we sent out a message asking: “School Improvement: Who’s Mapping and Analyzing Student and Learning Supports?”

As best we can tell, despite the clear need, the answer often is nobody.

Some administrators indicate that as much as 25% of their budget is expended on working with students who manifest learning, behavior, and emotional problems. But current programs and services are fragmented, sometimes redundant, and often focus on a few students rather than the many in need.

It is time for a school improvement focus on weaving student and learning supports into a unified cost-effective system and making plans for evolving the system over the next few years.

The first step at state, district, and school levels is to map and analyze all resources being used to address barriers to learning and teaching and re-engage disconnected students.

Mapping and analyses of what’s in use provides a basis for identifying what is and isn't cost-effective, where redundancies have arisen, and what critical gaps exist.

This information enables system building by re-deploying available resources. Moreover, enhanced intervention effectiveness and economies of scale can be achieved by collaborative system-building across several schools (e.g., a high school and its feeders) and weaving together school and community resources.

For guidance in carrying out this work, see the Center’s mapping and analysis tool and list of six process steps – online at [http://smhp.psych.ucla.edu/summit2002/tool%20mapping%20current%20status.pdf](http://smhp.psych.ucla.edu/summit2002/tool%20mapping%20current%20status.pdf)

If you want more information about mapping and analyzing student and learning supports, just send an email to adelman@psych.ucla.edu or Ltaylor@ucla.edu

"It is easier to build strong children than to repair broken adults.

Frederick Douglas"
NEWS FROM AROUND THE COUNTRY

The lost children of Katrina. About half of Katrina evacuees were said to have hailed from badly devastated New Orleans, many from flood-prone, high-poverty neighborhoods. Most children had attended the city’s public schools, notorious for dilapidated buildings and classes from which fewer than half the students graduated. While some displaced children thrived in better schooling elsewhere, countless others didn’t have an opportunity to settle down: Many low-income New Orleans evacuees spent several years after the storm in nomadic exile, moving among family members’ residences or in search of jobs or housing. 4/2/15

Middle students find success in tutoring peers. In the midst of national debate over how to differentiate instruction, a new program shows potential to significantly boost mathematics and science learning by leveraging a group of students who often go unnoticed: middle-of-the-road achievers. The Peer Enabled Restructured Classroom program recruits average students to create a small army of teaching assistants in math and science that is significantly boosting both their own academic progress and that of their peers. The program, now operating in nine NY City secondary schools, was created by the National Science Foundation-funded Math-Science Partnership, a collaboration by researchers at several colleges in the city university system. 4/2/15
http://www.edweek.org/ew/articles/2015/04/01/middle-students-find-success-tutoring-peers-in.html?r=223430965

Rural schools often the heart of small towns. Nearly one-third of the nation’s public schools are in rural areas. Eastern Washington’s farm country has a high concentration of school districts with fewer than 500 students. Town residents embrace the school children by attending events and volunteering their time or land. Class sizes are small. Rural communities follow the kids. And in return, the kids take part in the community. Students clean up roads, serve dinner at the Lions Club, rake leaves and help with setup and teardown at town events. 4/18/15

Where kids learn more outside their classrooms than in them. Amid the growing push to reinvent the nation’s public high schools, initiatives that connect students more directly to their individual interest and tap into their innate motivations are gaining popularity. New Hampshire is one of a handful of states at the forefront of efforts to promote flexibility in how student learn and how that knowledge is measured. In New Hampshire, what are known as “extended learning opportunities” can take the form of workplace internships, volunteer work, individualized students, or one on one instruction. In this new model of student centered learning, teachers function more as coaches and the students are active collaborators. 4/12/15. Http://www.theatlantic.com

Quote from article above on student centered learning

You want kids to see there’s a path from now to the future, that the path involves school, and that current choices to invest effort and keep trying in school matter for future options. If I’m a kid who’s worried because I’m not sure what career path is right for me, that could spill over into being unsure about what I want to do in school.

Daphna Oyserman

If we teach today’s students as we did yesterdays, we are robbing them of tomorrow.

John Dewey

THIS MONTH’S FOCUS FOR SCHOOLS TO ADDRESS BARRIERS TO LEARNING

Planning End of the Year Celebrations That Promote Hope and Help Minimize Risky Celebratory Behaviors

The end of the school year is a special time, especially for secondary students.

From the Washington Post, reporting tentative survey results to shine light on the extent to which teenagers and their parents say they will spend money on the annual prom.

“The survey says that overall prom costs are actually down 6 percent this year for the average family with teenagers, from $978 for clothes, limo rental, tickets, flowers, pictures, dinner, after-party events, etc., down to an expected average of $919 for this year. What’s more, this year parents are planning to cover more of prom costs — from 56 percent of the total last year to 73 percent of the cost this year. One concerning finding: families making under $25,000 plan to spend a total average of $1393 for prom, while families making more than $50,000 annually will spend an average of $799....”

Proms and grad nights aside, the end of every school year is an important time for all students, their families, and staff. For most students, it is a time to be congratulated and to celebrate. For some, it is a temporary reprieve from problems experienced at school. For all, it is the time to find hope for the future and experience a sense of having accomplished something worthwhile. And it is a time to help everyone celebrate in ways that minimize tragedy.

The key to focusing on hope and accomplishment is to identify whatever a student has done positively, clarify how the student can build on this in coming years, and convey all this personally to the student and family. Drawing on what we know about personal motivation, the focus needs to be on specifics that can enhance feelings of competence, self-determination, and connectedness to significant others and that minimize messages that threaten such feelings.

With respect to end of the year events, each can be something to cherish, and the anticipation of each represents a natural opportunity to promote social and emotional learning (e.g., enhanced understanding of self and others, increased sense of responsibility for self and others, expanded social problem solving skills). Of special concern are teen parties and proms. These especially call for guidance and support to maximize positive and minimize negative outcomes.

We were impressed by this remembrance from a student working in our Center:

“... what my high school did toward the end of the year that was different than many other schools was the type of ‘grad night’ we had. Whereas many schools rent out [a local entertainment center] and have dances there and go on rides and many students get intoxicated before attending, at my school grad night was held on campus. The parents
worked it and there were different activities like fake gambling, craps tables, dancing, a smoothie bar, food, and "crash room" to sleep since it went until 5am, rock climbing, a palm reader, inflatable jumper obstacle course, face painting, karaoke and much more. When I tell friends from other high schools/friends I made at college, the majority give me positive feedback saying that it sounds like a lot more fun than what they did. I think this is because instead of having the whole [entertainment center] where groups can get separated and remain in cliques ..., it was in our gym and outside in what was called "senior park;" So it remained tight knit, so to speak, making it easier to spend time with a lot of different students and not get lost in a large area. Also, because parents worked the booths, students did not show up intoxicated. There was no re-entry allowed and because it was on campus, even if a few students did decide to drink before the event, it lessened the danger of driving on a freeway to get there because it is possible that they could simply walk over to the school. ... It was a night that I will never forget and one of my greatest memories and it was in a positive setting and a good way to have safe fun.”

How do the schools in your locale celebrate the end of the year in classrooms and schoolwide with a view to validating the effort and learning of every student and the contributions of every staff member? Send responses for sharing with others to Ltaylor@ucla.edu

*Note:* Integrating support for learning and teaching into the natural opportunities and phases of the school year provide unlimited opportunities. For a range of ideas organized by each month, see *Ideas for Enhancing Learning Supports at your school this month* on the homepage at http://smhp.psych.ucla.edu
2015 NATIONAL INITIATIVE FOR TRANSFORMING STUDENT & LEARNING SUPPORTS

A Few Updates from Districts as They Move Forward

(1) *From Bloomington, MN:* “We want to share where we are on the journey to establishing a Comprehensive and Unified System of Learning Supports. As you know our district has restructured into the Three Component Framework (Instruction, Learning Supports, Management).

As we specifically look at Learning Supports much work has been done to align groups. We now have our Office of Educational Equity and Office of Family Engagement as one group under the Learning Supports umbrella. This is a critical step in a process of restructuring in order to dig deeper into the work of establishing a system of Learning Supports.

The coordinator for Response to Intervention is also acting as the Learning Supports Coordinator as the work is very much intertwined. The District Learning Supports Team has tackled many barriers to learning and teaching:

- Weekend Hunger
- Winter Clothing
- Section 504
- Homeless Youth under the McKinney-Vento Act
- Identifying non-academic indicators of success for College and Career
- Breakfast usage and access at Elementary Schools
- Re-Imagining Summer School for Elementary Students ...

...and many more at the building level.

While these are just the tip of the iceberg they are examples of our work across departments, initiatives, and community. The real change is coming in how we work with each other in various roles and departments, using the ‘goal not role’ model. There is much work to do, but we are committed to the work. As we look toward the next couple of months we anticipate additional structural changes as we endeavor to do work differently; with Instruction and Learning Supports being equal and essential.”

(2) *Re the scale up of the Comprehensive System of Learning Supports in Alabama:* “The Alabama implementations are going well. They plan to add 30 more districts next year bringing them to a total of 70. We have 3 consultants now and are training 5 to 6 more consultants. The model is customized to each district; however, the common factor is that work begins with the district level shifting to work in the three components, and then to the school level teams to align them in the work and use the six content arenas to develop strategic plans. The most important lesson that we learned is the necessity to have on-going coach/facilitator support over a period of time.”

For an example of efforts in one of the Alabama districts, see Macon County’s webpage.

Reminder about:

Transforming Student and Learning Supports:
Developing a Unified, Comprehensive, and Equitable System

Online for free access, the work provides protocol frameworks for a systemic learning supports component to replace the existing marginalized and fragmented set of student and learning supports in districts and schools. It stresses that transformation can be done by redeploying existing resources and garnering economies of scale.

Teacher: Joe, can you name two pronouns?
Joe (taken by surprise): Who? Me?

COMMENTS AND SHARING FROM THE FIELD

We are so pleased by the positive response to 2015 National Initiative resources and other related Center efforts that we can’t resist sharing; so here’s a taste:

1. “I just read through your book and it is an excellent resource! Since it says that I can download it, thank you, I will do that and use it to advocate.... You provide valuable assets to our statewide community.”

2. “I have started to review the information you have sent and find it very interesting. Serving all of our students with the ultimate goal of graduation with ongoing success in life is critical for each individual and the future of our world. I really like your focus on systems and learning supports for our students with the largest growth gaps. I am looking forward to taking a deeper look.”

3. “I often use the information you send me to dig for resources or direct some of our work. I am very thankful for your commitment and dedication, it is often the positive reinforcement that I need to get through the week!”

We were asked to share the following:

1. From Jonathan Cohen President, National School Climate Center: Please let folks know about a webinar I am doing with the Mid Atlantic REL and IES on Assessing and Improving School Climate – [www.relmidatlantic.org/public-events](http://www.relmidatlantic.org/public-events) Thursday May 7th.

2. Doctoral candidate looking for help from pre-k educators to take a classroom survey focused on “Educating Traumatized Students.” Survey closes May 15. Participants have a chance to win $100 gift card toward classroom supplies. [https://www.surveymonkey.com/s/X9653G5](https://www.surveymonkey.com/s/X9653G5)

3. “I'm writing as the mother of two pre-teen kids. Like many kids, they will experience some level of bullying in their lifetime. The physical aggression starts out higher among students and then decreases consistently, with 18 percent of children aged 2-5 reporting experience with physical aggression, but only 10 percent of children aged 14-17 reporting it. Recently, I edited a piece by Ann Steele, a professional MF therapist, on the psychological affects of bullying on kids and teens. Her article covers a number of angles including where and when does bulling occur, who is harmed, common misconceptions as well as the lasting psychological impacts. You can read about the impacts on teens and kids here → [http://mastersinpsychologyguide.com/articles/psychological-effects-bullying-kids-teens](http://mastersinpsychologyguide.com/articles/psychological-effects-bullying-kids-teens)
THIS IS THE END OF THIS ISSUE OF ENEWS

Who Are We? The national Center for Mental Health in Schools was established in 1995 under the auspices of the School Mental Health Project (which was established in 1986). We are part of the Department of Psychology at UCLA. The Project and Center are co-directed by Howard Adelman and Linda Taylor.

For more information about the Center and its many resources, go to the website at http://smhp.psych.ucla.edu or email Ltaylor@ucla.edu or adelman@psych.ucla.edu

Send info to share with others or ask for specific resources by email to Ltaylor@ucla.edu
