WHAT IS ENEWS? (For those who don't know) This is another link for those concerned with enhancing policies, programs, and practices related to addressing barriers to student learning and to promoting mental health in schools. It augments the other ways our Center shares information and facilitates interchange/networking.

**EMERGING ISSUE**

>>>Children and Depression   The Popular Press Accelerates Discussion of Concerns

Recently, several national magazines, TV, and trade books have increased public attention related to child/adolescent affect/mood disorders (depression, bipolar). Not surprisingly, this has elevated the concern of many families about whether their youngster fits the diagnostic criteria. Among clinicians, the discussion has focused on concerns about the validity of instruments for making such diagnoses and the appropriateness of certain treatments for young people. Some social critics see all this as another tendency to overpathologize facets of youth behavior that should be seen as within the normal limits. Practically, the increased attention means that schools will be expected to be more in tune with the issues surrounding affect and mood problems, and, indeed, everyone who works with youngsters will need to think the issues through in ways that reflect the best interests of children and adolescents.

Those who need to learn more about the topic may want to go to our website's Quick Find Search and click on Depression for easy access to some Center-produced resources and to link with other resources on the internet.

Do you have anything you want to share with respect to all this??? We look forward to your comments.

Send your response by email to: smhp@ucla.edu and we will post it on our website's Net Exchange (http://smhp.psych.ucla.edu) page for others to read and respond.

Or you can respond by phone (310/825-3634) or by fax (310/206-5895)

>>>NOMINATIONS FOR AWARD FROM SAMHSA

>>Outstanding school-based mental health program

This annual award acknowledges the work of an outstanding-school based program that advances mental health in schools and the healthy social-emotional development of children. The 2003 award will be given to a school-based mental health program that has demonstrated through formal evaluation excellence in prevention and/or addressing problems early after their onset.

The awardee will receive a free conference registration and stipend ($250) at the 8th annual National Conference in Portland, OR. Nominations for this award should be external (i.e., no self-nominations) and should include a one page (single-spaced) description of the nominee's contributions. Please include a cover letter with contact information for the person or persons nominating the award candidate.

Nominations should be sent to:
Michelle Edwards at the Substance Abuse and Mental Health Services Administration's Center for Mental Health Services, Room 17C-05, 5600 Fishers Lane, Rockville, MD 20857 by September 9, 2003. Please use the designated response format.

A 3 person panel will review the nominations and notification should be no later than the week of Sept. 23.

The award will be presented by a representative of SAMHSA at the 8th Annual Conference on Advancing School-Based Mental Health Programs in Portland, OR in October, 2003.

Designated Response Format

SAMHSA School-Based Mental Health Award - 2003

Name of nominee____________________________________ Date___________
School_________________________ Name of Program____________________
Phone____________________Fax_____________________E-mail___________
Address___________________________________________________________
Nominated by_______________________________________Phone__________

Please address the following: how the program has contributed through formal evaluation, excellence in prevention and/or addressing problems early after their onset through mental health services (50 points), policy (25 points), and school climate (25 points). Please limit the nomination to one, single-spaced page.
**NEWS FROM AROUND THE COUNTRY**

*OHIO SURVEY CITES 6 - 8 % OF STUDENTS HAVE EMOTIONAL OR BEHAVIORAL PROBLEMS*

A mental health survey of 21,915 students in grades 5 - 12 in four Ohio counties found 6-8% (higher than the national rate of 3-5%) report high scores on several questions. The figures mostly exclude youth already diagnosed. 11% say they feel depressed most or all of the time; 37% said they thought or talked about death at least once in the past 30 days; 20% said they intentionally hurt themselves in the past month; 6% said their future looks bad or very bad; 16% felt that teachers rarely if ever cared about them. "The mental health survey results will be used to redesign services and to seek more funding to expand services...study sponsors say every school should be getting regular service from a trained mental health therapist or counselor..." (Cincinnati Enquirer, 8/3/03)

*STATE BILL TO SUSPEND DRIVING PRIVILEGES OF TEENS USING DRUGS*

The Oregon House and Senate will work on reconciling the bill each passes that would suspend the driving privileges of high school teens who have been suspended twice for using illegal drugs on school property or at a school activity. In 2001-02, 886 students were expelled for alcohol and other drug violations. A 15 year old student's reaction: "Students already go to school like that knowing they can be suspended. Why would losing their license be any different? They'll just be driving without a license now." (Join Together, 7/28/03)

*STATES IDENTIFY SCHOOLS IN NEED OF IMPROVEMENT*

>"Nearly 90% of Florida's public schools failed to meeting reading and math standards this year under the new federal No Child Left Behind Law" (Miami Health, 8/8/03)

>"57% of Delaware's public schools failed to make adequate yearly progress in math and reading...25 of the state's 28 high school are rated an under academic review...3 of the state's 33 middle schools making adequate yearly progress." (Delawareonline.com, 8/12/03)

>"Three hundred and sixty-five Oregon schools, including more than two-thirds of the state's high schools were tagged as educationally inadequate." (Oregonlive.com)

>"About half of all public schools in Pennsylvania aren't meeting minimum standards in math, reading or other areas." (Post-gazette, 8/13/03)
*NO CHILD LEFT BEHIND LEGISLATION REQUIRES SCHOOL OVERHAULING

Only one of the school's 23 teachers taught at Vine Elementary last year. Every staff member had to reapply in the overhaul of this low-performing school. "Most of the Vine Elementary students walk to school along one of the roughest streets in Cincinnati. Many come from the same impoverished neighborhood where drug dealers hang out on corners next to boarded-up buildings and crime statistics are among the highest in the city. A quarter of the students have learning disabilities. Most live at or below poverty level and live with just one parent or a grandparent." District officials auditing the school's progress last year wrote: "The Vine staff is working very hard. They certainly can't work any harder." After four years of not showing improvement on state tests and in graduation and attendance rates, NCLB legislation requires schools replace all or most of the staff, turn the school over to the state, employ a consultant to advise school management, reopen as a public charter schools, or take other steps to reorganize. (Cincinnati Enquirer, 8/22/03)

*HOW SOME SCHOOLS MAKE DANGEROUS LIST WHEN OTHERS DON'T

Doris Miller Junior High Schools is on a federal list of "persistently dangerous" schools. It is one of six schools in Texas and perhaps fewer than 100 nationwide. The junior high reported 15 incidents between 1999 - 2002 that state officials deemed "expellable" felonies. Schools must submit a corrective plan within 30 days. "People here may not have much money, but like parents everywhere, they want their schools safe. Many are looking for private schools or voucher programs at the last minute as a result of the new designation. At least 18 students have transferred out of Doris Miller so far....While the U. S. Department of Education has not tallied the total number of schools reported an dangerous, at least nine states have listed no schools at all. New Jersey has designated the most with seven." (Christian Science Monitor, 8/20/03)

*DAYTIME CURFEW PROPOSED FOR YOUTH UNDER 18

Springfield Township, Ohio, will vote on an ordinance that would prohibit youths under age 18 from being in a public place on school days between 8 a.m. and 3 p.m. After a first warning parents would be fined. "If a youth is hanging out on the street after being kicked out of school, the daytime curfew ordinance is the only way police officers can sweep the kids off the street." The legal director for the Cleveland ACLU said "This seems to create a presumption of criminality against kids just because they're kids." (Cincinnati Enquirer, 8/20/03)

(Note: see our website What's New, for a current news item posted each week.)
"In the constantly shifting, highly verbal world of public education, parents are at a distinct disadvantage. As soon as your child enters kindergarten, you recognize that the people in the school buildings speak a different language. By your first teacher's conference, while you recognize that they're talking about your child, between the abbreviations (CAT tests) and the technical terms (decoding skills), you begin to doubt your...well, your decoding skills."

Daniel Wolf

THIS MONTH'S FOCUS FOR SCHOOLS TO ADDRESS BARRIERS TO LEARNING

Schools have a yearly rhythm changing with the cycle and demands of the school calendar. To strengthen prevention and early intervention, school staff can anticipate and plan for these predictable challenges. You can view all 12 monthly themes online. They are also compiled into a document that can be downloaded, at no cost.

September Welcoming Strategies for Students and their Families
Starting a new school can be scary. Those concerned with mental health in schools can play important prevention and therapeutic roles by helping a school establish a welcoming program and ways to provide ongoing social support. For examples of such programs (with tools and guidelines) see Ideas for Enhancing Support at your School this Month at (http://smhp.psych.ucla.edu).

"Parents and teachers are in the same difficult situation together, besieged by outside experts pointing out what we are supposedly doing wrong."

Dorothy Rich

"Of course we need standards and resources to make our schools work well in solving the myriad tasks they face. But resources and standards alone will not work. We need a surer sense of what to teach to whom and how to go about teaching it in such a way that it will make those taught more effective, less alienated, and better human beings."

Jerome Bruner

Kyle's Reversal: Generalists learn less and less about more and more until they know nothing about everything.

** CALLS FOR GRANT PROPOSALS, PRESENTATIONS, AND PAPERS

GRANTS:

   > Jacob Javits Fellowship Program (CFDA# 84.170A ) Due October 3.

   > Graduate Assistance in Areas of National Need Program (CFDA# 84.200A) Due November 7

>> National Institute of Mental Health, National Institute on Drug Abuse, and National Institute of Child Health and Human Development
   > Behavioral, Social, Mental Health, and Substance Abuse Research with Diverse Populations, Due October 1 (http://www.nih.gov)

>> National Institute of Mental Health, National Institute on Drug Abuse, National Institute on Alcohol Abuse and Alcoholism
   > Developing Research Centers on Interventions for the Prevention of Suicide (RFA-MH-04-003) Letter of intent due October 17.
   (Http://www.nimh.nih.gov)

>> Substance Abuse and Mental Health Services Administration (http://www.samhsa.gov)
   > Knowledge Dissemination Conference Grants (PA-03-002) Due September 10
   > Comprehensive Community Child Mental Health Initiative (SM-03-009) Due October 15

SAMHSA is soliciting comments on proposed changes in the way grants will be announced. SAMHSA is proposing to issue four standard grant announcements. These will replace the 30-40 individual announcements that have been issued each year. The four types of grants are service grants (to implement substance abuse and mental health services), infrastructure grants (to support system change), best practices planning and implementation (to identify practices to meet local needs, develop strategic plans for implementing or adapting these prior to full scale implementation), and service to science grants (to document and evaluate innovative practices not yet evaluated). To submit comments, e-mail samhsa_standard_grants@samhsa.gov.

CALLS FOR ABSTRACTS FOR CONFERENCES:

(Note: If you want to Surf the Internet for Funds, go to http://smhp.psych.ucla.edu. Click on Quick Find, Scroll down Center Responses to FINANCING AND FUNDING. Provides links to funding sources and our Quick Training Aid on Financing Strategies to Address Barriers to Learning)

>>NEWS FROM THE TWO NATIONAL CENTERS FOCUSING ON MENTAL HEALTH IN SCHOOLS

^ ^ ^ Updates from our Center at UCLA

*New and Updated (Online and in hardcopy)
  >>"Sustaining School-Community Partnerships to Enhance Outcomes for Children and Youth: A Guidebook and Tool Kit"
  >>"New Initiatives: Considerations Related to Planning, Implementing, Sustaining, and Going to Scale: A Center Brief"
  >>"New Directions for Student Support: Some Fundamentals." (Provides indepth readings on the rationale and research related to learning support)

*Summer Newsletter is in the mail
  Lead article features "New Directions: Where's it Happening?" and provides brief overview of work on learning supports in Hawai'i; Madison, WI; St. Paul, MN; and through the Urban Learning Center Design of the Comprehensive School Reform Initiative. A Commentary stresses: "Don't Forget About the Mental Health of School Staff." Featured "Ideas into Practice" come from responses on the Mental Health in Schools Practitioner Listserv that discuss (a) responding to children whose parents have been called to active duty and (b) principles of effective family focused interventions.

*Latest Publication:
  "On Sustaininability of Project Innovations as Systemic Change" Journal of Educational and Psychological Consultation, 14(1) 1-25.

*Activities Related to Summits Initiative: New Directions for Student Support:
  >Outreach Mailing  Continuing to send outreach mailings to school leaders across the country to raise awareness about the importance of new directions for student/learning support. Let us know if there are folks to whom you want us to outreach. Also, feel free to download the outreach material from our website and share it. Incidentally, many of those responding are indicating interest in participating in the Summit Initiative: New Directions for Student Support, and these will be among the first invited to regional and state summits.
Next Regional Summit  With the Region VII Comprehensive Center as a Co-host, plans have been finalized for the September 9th Kansas City Regional meeting for the six states served by the Region VII Comprehensive Center (IL, IN, NE, MO, OK, KS). The Comprehensive Center will continue to follow through in working with us and each state's representatives to plan follow up state summits for these six states.

Next State Summit  A state planning group has been formed for the November 5th Wisconsin state summit. The state group will co-host and provide leadership in identifying local examples of New Directions for Student Support.

Related Materials are online and in hardcopy (on the Center website homepage click on green button "Summits for New Directions")

Press Release:

Education writers and editors of journals and newsletters concerned about learning support have been sent a press release describing the importance of New Directions for Learning Support. The intent is to further strengthen awareness of the resources available in schools and communities to strengthen student success.

If you would like to use and/or forward the info, the press release is on our website (after clicking "Summits for New Directions," click on "Why New Directions are an Imperative" and open the News Release).

*This Month's Ideas for Enhancing Support at your school "September Welcoming Strategies for Students & their Families" (see info provided earlier in this ENEWS)

LET US KNOW WHAT YOU NEED. New resources can be developed and best practices identified. Also, let us know about the latest and greatest you encounter so we can update our resources and youth colleagues across the nation.

**REQUESTS/INFO/COMMENTS/QUESTIONS FROM THE FIELD**

Responses to last month's emerging issue "Backlash to overstating the science-base for school interventions"
"Having just spent the last year examining the nations' school-based drug prevention programs, I am in mixed agreement with Gorman's perspective regarding the questionable science of the heavily promoted science based prevention programs. He is correct in reporting the flawed quality of some school based programs. Many programs are presented as effective despite findings to the contrary. The prevention field is complex and developing meaningful interventions is difficult. Because our youth are an ever changing population, growing up in an ever changing culture and world, prevention programs must be dynamic and flexible."

"As a school district administrator and consultant with the state department of education, I have been involved in many interventions that have appeared to be successful in helping students with persistent school behavior and attendance problems, but the key to success is not just the structure of the intervention...the key to success...often depends on the skills of the team members in implementing the...strategies...sometimes the variance has to do with what resources are available in the school or community, and sometimes the variance is due to the skill...in incorporating the strengths of the family in the plan to resolve the problem...I would hate to see school districts abandon (good) interventions while they wait for a study to prove the effectiveness."

"In education research, numerous interrelated factors effecting learning, including legal, cultural, socio-economic, biological, interpersonal, and individual factors, create a very complex multifunctional environment in which to conduct research."

"It appears that we need "science-based research" directed towards those claiming to have applied scientific research on various prevention programs and curriculum."

"...given the history of flawed research and inappropriate conclusion...how many less visible programs on the list are similarly flawed? Doubtless some of them do what they claim, but there is no way to be sure when the research basis for their certification is often not available in research journals but only in reports submitted to federal agencies that feel great pressure from the Congress to find programs that "work."...There is another basic flaw in much if not all of the research on drug prevention education. No information is given about what young people who have experienced these programs actually think about them."

Anything you would like to share? Send it to us at smhp@ucla.edu.

development, direct assistance, and facilitating networking and exchanges of ideas. We demonstrate the catalytic use of technical assistance, internet, publications, resource materials, and regional and national meetings to stimulate interest in program and systemic change. Specific attention is given to policies and strategies that can (a) counter fragmentation and enhance collaboration between school and community programs, and (b) counter the marginalization of mental health in schools. Center staff are involved in model development and implementation, training and technical assistance, and policy analysis. We focus on interventions that range from systems for healthy development and problem prevention through treatment for severe problems and stress the importance of school improvement and systemic change. There is an emphasis on enhancing collaborative activity that braids together school and community resources. The Center works to enhance network building for program expansion and systemic change and does catalytic training to stimulate interest in such activity. We connect with major initiatives of foundations, associations, governmental, and school and mental health departments. Evaluations indicate the Center has had considerable impact in strengthening the network of professionals advancing the field of mental health in schools and in changing policies and practices.
