Mapping Funding Sources

As schools and communities work to develop partnerships, their interest is in existing resources and what new support is needed. Mapping existing funding is a key facet of asset mapping and is fundamental to comprehensive analyses and (re)deployment of resources.

The following tool can be used as a guide for identifying the various sources that may be providing funds for programs and services at a school.

As existing funding is identified, it can be mapped in a standard budgeting spreadsheet format.

This is also a good stage at which to map other relevant resources such as facilities and equipment that are relevant to the endeavors of addressing barriers to learning and promoting healthy development.
