

## ***CREATING A CARING CONTEXT FOR LEARNING AND HEALTHY DEVELOPMENT***

*Learning is neither limited to what is formally taught nor to time spent in classrooms. It occurs whenever and wherever the learner interacts with the surrounding environment. All facets of the community (including the school) provide learning opportunities – thus the term **learning community**.*

*Whenever a surrounding environment tries to facilitate learning, the process can be called teaching. Teaching occurs at school, at home, and in the community at large. It may be formalized or informally transmitted. Teaching happens most positively when the learner wants to learn something and the surrounding environment wants to help the learner do so. That is, positive learning is facilitated when the learner cares about learning and the teacher cares about teaching. The whole process undoubtedly benefits greatly when all the participants care about each other.*

**F**rom a psychological perspective, it is important that teachers establish a classroom atmosphere that encourages mutual support and caring and that creates a sense of community. Such an atmosphere can play a key role in preventing learning, behavior, emotional, and health problems. Learning and teaching are experienced most positively when the learner cares about learning and the teacher cares about teaching.

*Stated simply, the whole process benefits greatly when all the participants care about each other.*

Caring has moral, social, and personal facets. And when all facets of caring are present and balanced, they can nurture individuals and facilitate the process of learning. At the same time, caring in all its dimensions should be a major focus of what is taught and learned. That is, the classroom curriculum should encompass a focus on fostering socio-emotional and physical development.

Caring begins when students (and their families) first arrive at a school. Classrooms and schools can do their job better if students feel they are truly welcome and have a range of social supports. A key facet of welcoming encompasses effectively connecting new students with peers and adults who can provide social support and advocacy.

On an ongoing basis, caring is best maintained through use of personalized instruction, regular student conferences, activity fostering social-emotional development, and opportunities for students to attain positive status. Efforts to create a caring classroom climate benefit from programs for cooperative learning, peer tutoring, mentoring, advocacy, peer counseling and mediation, human relations, and conflict resolution. Clearly, a myriad of strategies can contribute to students feeling positively connected to the classroom and school.

*In the learning community, all are learners, and all may play some role as teachers. A teachers can be anyone who wants to facilitate learning – professional teachers, aides, volunteers, parents, siblings, peers, mentors in the community, librarians, recreation staff, etc. All constitute what can be called the **teaching community**.*

Given the importance of home involvement, attention also must be paid to creating a caring atmosphere for family members. Increased home involvement is more likely if families feel welcome and have access to social support at school. Thus, teachers and other school staff need to establish a program that effectively welcomes and connects families with school staff and other families to generate ongoing social support and greater participation in home involvement efforts.

Also, just as with students and their families, school staff need to feel truly welcome and socially supported. Rather than leaving this to chance, a caring school develops and institutionalizes a program to welcome and connect new staff with those with whom they will be working. And it does so in ways that effectively incorporates newcomers into the organization.

As Andy Hargreaves stresses, the way to relieve "the uncertainty and open-endedness in teaching" is to create "communities of colleagues who work collaboratively [in cultures of shared learning and positive risk-taking] to set their own professional standards and limits, while still remaining committed to continuous improvement. Such communities can also bring together the professional and personal lives of teachers in a way that supports growth and allows problems to be discussed without fear of disapproval or punishment."

The center is co-directed by Howard Adelman and Linda Taylor and operates under the auspices of the School Mental Health Project, Dept. of Psychology, UCLA, Los Angeles, CA 90095-1563 Phone: (310) 825-3634. Support comes in part from the U.S. Department of Health and Human Services, Public Health Service, Health Resources and Services Administration, Maternal and Child Health Bureau, Office of Adolescent Health, with co-funding from the Substance Abuse and Mental Health Services Administration's Center for Mental Health Services.
