Attached is a self-study survey. For purposes of this tutorial, just read over the items. These provide a sense of what might take place related to enhancing home involvement.

The survey itself can be used at a school in a number of ways (see the introductory page entitled: “About the Self-Study Process to Enhance the Component for Addressing Barriers to Student Learning”).

Surveying and Planning to Enhance Efforts to Address Barriers to Learning at a School Site

The following resource aids were designed as a set of self-study surveys to aid school staff as they try to map and analyze their current programs, services, and systems with a view to developing a comprehensive, multifaceted approach to addressing barriers to learning.

In addition to an overview Survey of Learning Supports System Status, there are self-study surveys to help think about ways to address barriers to student learning by enhancing

- Classroom-based Approaches to Enable and Re-engage Students in Classroom Learning
- Crisis Assistance and Prevention
- Support for Transitions
- Home Involvement in Schooling
- Community Outreach for Involvement and Support
- Student and Family Assistance Programs and Services
- School-Community Collaboration
About the Self-Study Process to Enhance the Component for Addressing Barriers to Student Learning

This type of self-study is best done by teams.

However, it is NOT about having another meeting and/or getting through a task!

It is about moving on to better outcomes for students through

> working together to understand what is and what might be
> clarifying gaps, priorities, and next steps

Done right it can

> counter fragmentation and redundancy
> mobilize support and direction
> enhance linkages with other resources
> facilitate effective systemic change
> integrate all facets of systemic change and counter marginalization of the component to address barriers to student learning

A group of school staff (teachers, support staff, administrators) could use the items to discuss how the school currently addresses any or all of the areas of the component to address barriers (the enabling component). Members of a team initially might work separately in responding to survey items, but the real payoff comes from group discussions.

The items on a survey help to clarify

> what is currently being done and whether it is being done well and
> what else is desired.

This provides a basis for a discussion that

> analyzes whether certain activities should no longer be pursued (because they are not effective or not as high a priority as some others that are needed).
> decides about what resources can be redeployed to enhance current efforts that need embellishment
> identifies gaps with respect to important areas of need.
> establishes priorities, strategies, and timelines for filling gaps.

The discussion and subsequent analyses also provide a form of quality review.

**Home Involvement in Schooling: A Self-study Survey**

This arena expands concern for parent involvement to encompass anyone in the home who is influencing the student’s life. In some cases, grandparents, aunts, or older siblings have assumed the parenting role. Older brothers and sisters often are the most significant influences on a youngster’s life choices. Thus, schools and communities must go beyond focusing on parents in their efforts to enhance home involvement.

This arena includes school-wide and classroom-based efforts designed to strengthen the home situation, enhance family problem solving capabilities, and increase support for student well-being. Accomplishing all this requires school-wide and classroom-based systems and programs to (a) address the specific learning and support needs of adults in the home, such as offering them ESL, literacy, vocational, and citizenship classes, enrichment and recreational opportunities, and mutual support groups, (b) help those in the home improve how basic student obligations are met, such as providing guidance related to parenting and how to help with schoolwork, (c) improve forms of basic communication that promote the well-being of student, family, and school, (d) enhance the home-school connection and sense of community, (e) foster participation in making decisions essential to a student's well-being, (f) facilitate home support of student learning and development, (g) mobilize those at home to problem solve related to student needs, and (h) elicit help (support, collaborations, and partnerships) from those at home with respect to meeting classroom, school, and community needs. The context for some of this activity may be a *parent or family center* if one has been established at the site. Outcomes include indices of parent learning, student progress, and community enhancement specifically related to home involvement.
Home Involvement in Schooling

Indicate all items that apply.

I. Addressing Specific Learning and Support Needs of the Family

A. Does the site offer adult classes focused on
   1. English As a Second Language (ESL)?
   2. basic literacy skills?
   3. GED preparation?
