
How can the AI revolution enhance student/learning supports?

Are you experiencing a tidal wave of advocacy for embedding AI into schools? We certainly are.

What we are not hearing enough about are examples of how AI can enhance and help transform student/learning supports.

Perhaps we have just been missing relevant discussions.

We want to get ahead of the curve on this matter.

Can you share some examples and ideas specific to AI as a facet of enhancing and transforming student/learning supports?

Send to Ltaylor@ucla.edu or adelman@psych.ucla.edu

Looking forward to hearing from you!

Best wishes and be well,

Howard & Linda

Howard Adelman, Ph.D., Professor of Psychology & Center Co director

Linda Taylor, Ph.D., Center Co director

Dept. of Psychology, UCLA
